PREFACE

Curriculum development is a highly organized and systematic process and involves a number of procedures. Many of these procedures include incorporating the results from international research studies and reforms made in other countries. These studies and reforms are then related to the particular subject and the position in Pakistan so that the proposed curriculum may have its roots in the socio-economics setup in which it is to be introduced. Hence, unlike a machine, it is not possible to accept any curriculum in its entirety. It has to be studied thoroughly and all aspects are to be critically examined before any component is recommended for adoption.

In exercise of the powers conferred by sub-section (1) of section 3 of the Federal Supervision of Curricula Textbooks and Maintenance of Standards of Education Act 1976, the Federal Government vide notification No. D773/76-JEA (cur.), dated December 4th, 1976, appointed the University Grants Commission as the competent authority to look after the curriculum revision work beyond class XII at the bachelor level and onwards to all degrees, certificates and diplomas awarded by degree colleges, universities and other institutions of higher education.

In pursuance of the above decisions and directives, the Higher Education Commission (HEC) is continually performing curriculum revision in collaboration with universities. According to the decision of the special meeting of Vice-Chancellor’s Committee, the curriculum of a subject must be reviewed after every 3 years.

A committee of experts comprising of conveners from the National Curriculum Revision of HEC in Basic, Applied Social Sciences and Engineering disciplines met in April 2007 and developed a unified template to standardize degree programs in the country to bring the national curriculum at par with international standards, and to fulfill the needs of the local industries. It also aimed to give a basic, broad based knowledge to the students to ensure the quality of education. The new BS degree shall be of 4 years duration, and will require the completion of 130-136 credit hours. For those social sciences and basic sciences degrees, 63.50% of the curriculum will consist of discipline specific courses, and 36.50% will consist of compulsory courses and general courses offered through other departments.

For the purpose of curriculum revision various committees are constituted at the national level, comprising of senior teachers nominated by universities, degree awarding institutions, R&D organizations and respective accreditation councils. The National Curriculum Revision Committee for Pakistan Studies held on May 16-17, 2008 at HEC Regional Centre, Karachi in continuation of its earlier meetings held on October 23-24, 2007 revised the curriculum in light of the unified template. The final draft prepared by the National Curriculum Revision Special Committee, duly approved by the competent authority, is being circulated for implementation in the concerned institutions.

4 Year Degree Program-BS Hons

Introduction / Objectives

• In order to create awareness among the students about the “Vision of Pakistan”, as given by our leaders during the freedom movement and after the emergence of Pakistan, the rationale of Pakistan’s creation is highlighted. This approach will, hopefully, bring an element of objectivity in explaining the creation of Pakistan. It will also educate the students about the nature of the state of Pakistan as envisioned by its leaders.

This approach is also useful in educating the students about the taxonomy of the state and in motivating them to develop a sense of patriotism as well as an urge for creative reconstruction.

• In view of aforementioned objectives, the course framework is sought to be issue-oriented. It seeks to cover Pakistan’s Cultural Heritage since ancient times, Muslim Political Thought over the centuries, Constitutional Development since 1947, Political Systems and their functioning, Public Policies and Reforms, Agro-Industrial Projects, Urbanization, Social Change and Transformation, Political Development and Modernization, as well as the Democratization Process through Resource Development and Management, Good Governance and Mass Socialization, Mobilization and Participation. This multidimensional course framework seeks to encompass wide range of issues pertaining to nation-building and state-structure in Pakistan, and provides awareness about the remedial measures for overcoming impediments inherent in our cultural and political fabric.

• The issues of Human Rights have been given equal weight, so as to provide guidelines for reshaping the Pakistani society on constructive lines, and ridding it of all sorts of evils, impediments, exploitation and Oppression, as envisioned by the Quaid-i-Azam.

• Since a state cannot survive without a body of citizens integrated and united as a coherent nation, the issues concerning Pakistan’s march towards actualizing its vision of a modern-liberal Islamic republic have been dealt with in some detail.

• This curriculum seeks to develop students’ analytical and critical capabilities and broaden their vision. This will enable them to craft careers of their own choice. This will be done through extensive seminars and research projects for the most part. The courses seek to inculcate in students qualities of hard work, futuristic outlook and initiative to excel by way of healthy competition. These courses will make the students the most sought after persons in the job market and by the employers due to their perceptible outstanding merits in the fields of teaching and research.

After the completion of the course the students will have learned how to use analytical tools for examining social issues systematically, and to apply these tools to the study of a social issue. They will also learn how to evaluate data, assess the validity of arguments and establish relationship between data and conclusions.

Course Outline

1. Theme: Introduction to Social Issues
   a. What is a social issue? (Definitions)
   b. Why study current and persistent issues?

2. Theme: Analysis of a Social Issue
   (This section is to be done as a class so as to learn how to conduct an analysis of a social issue)
   a. Apply the definition of social issues to some examples
   b. Identify characteristics of the social issue
   c. Identify origins of the social issue (historical dimension – how has this issue come to be)
   d. Evolution of the social issue (political, economic, social dimensions)
   e. Conduct a functional analysis, conflict analysis and symbolic interactionist analysis
   f. Review conclusions from each analytical perspective

3. Theme: Practice using the above Formula
   (The purpose of this section is to facilitate a small group or individual to analyse a social issue)
   a. Identification of an issue
   b. Defining desired outcomes
   c. Identification of the places from which information can be collected and inputs received through consultation
   d. Data collection/conducting the research (reliability of a source, note taking, various means such as books, internet, community survey, questionnaire etc.)
   e. Analysis of the data to answer the question (measures of central tendency, dispersion, basic tabular analysis, etc)
   f. Draw conclusions
   g. Make recommendations
4. **Theme: Study of Analytical Tools**
   a. Statistical analysis (measures of central tendency, dispersion, etc)
   b. Focus groups (to determine how people think and feel)
   c. Scenario analysis (identify drivers and indicators)
   d. Q sorts (force choice and reveal mental models)
   e. Ethnographic analysis (understand how people think and feel)

COMPULSORY MATHEMATICS COURSES FOR BS (4 YEAR)

(FOR STUDENTS NOT MAJORING IN MATHEMATICS)

Note: University may select courses for Mathematics from the following list according to their requirement.

1. MATHEMATICS I (ALGEBRA)

Prerequisite(s): Mathematics at secondary level

Credit Hours: 3 + 0

Specific Objectives of the Course: To prepare the students, not majoring in mathematics, with the essential tools of algebra to apply the concepts and the techniques in their respective disciplines.

Course Outline:

Preliminaries: Real-number system, complex numbers, introduction to sets, set operations, functions, types of functions. Matrices: Introduction to matrices, types, matrix inverse, determinants, system of linear equations, Cramer’s rule.

Quadratic Equations: Solution of quadratic equations, qualitative analysis of roots of a quadratic equations, equations reducible to quadratic equations, cube roots of unity, relation between roots and coefficients of quadratic equations.

Sequences and Series: Arithmetic progression, geometric progression, harmonic progression.

Binomial Theorem: Introduction to mathematical induction, binomial theorem with rational and irrational indices.

Trigonometry: Fundamentals of trigonometry, trigonometric identities.

Recommended Books:

Dolciani MP, Wooton W, Beckenback EF, Sharron S, Algebra 2 and Trigonometry, 1978, Houghton & Mifflin,

Boston (suggested text)

Kaufmann JE, College Algebra and Trigonometry, 1987, PWS-Kent Company, Boston

2. MATHEMATICS II (CALCULUS)

Prerequisite(s): Mathematics I (Algebra)

Credit Hours: 3 + 0

Specific Objectives of the Course: To prepare the students, not majoring in mathematics, with the essential tools of calculus to apply the concepts and the techniques in their respective disciplines.

Course Outline:

Preliminaries: Real-number line, functions and their graphs, solution of equations involving absolute values, inequalities. Limits and Continuity: Limit of a function, left-hand and right-hand limits, continuity, continuous functions.
Derivatives and their Applications: Differentiable functions, differentiation of polynomial, rational and transcendental functions, derivatives.

Integration and Definite Integrals: Techniques of evaluating indefinite integrals, integration by substitution, integration by parts, change of variables in indefinite integrals.

Recommended Books:
Thomas GB, Finney AR, Calculus (11th edition), 2005, Addison-Wesley, Reading, Ma, USA

3. MATHEMATICS III (GEOMETRY)
Prerequisite(s): Mathematics II (Calculus)
Credit Hours: 3 + 0

Specific Objectives of the Course: To prepare the students, not majoring in mathematics, with the essential tools of geometry to apply the concepts and the techniques in their respective disciplines.

Course Outline:

Geometry in Two Dimensions: Cartesian-coördinate mesh, slope of a line, equation of a line, parallel and perpendicular lines, various forms of equation of a line, intersection of two lines, angle between two lines, distance between two points, distance between a point and a line.

Circle: Equation of a circle, circles determined by various conditions, intersection of lines and circles, locus of a point in various conditions.

Conic Sections: Parabola, ellipse, hyperbola, the general-second-degree equation

Recommended Books:
Kaufmann JE, College Algebra and Trigonometry, 1987, PWS-Kent Company, Boston

4. COURSE FOR NON-MATHEMATICS MAJORS IN SOCIAL SCIENCES

Title of subject: MATHEMATICS
Discipline: BS (Social Sciences).
Pre-requisites: SSC (Metric) level Mathematics
Credit Hours: 03 + 00
Minimum Contact Hours: 40
Assessment: written examination;
Effective: 2008 and onward

Aims: To give the basic knowledge of Mathematics and prepare the students not majoring in mathematics.

Objectives: After completion of this course the student should be able to:

• Understand the use of the essential tools of basic mathematics;
• Apply the concepts and the techniques in their respective disciplines;
• Model the effects non-isothermal problems through different domains;

INTRODUCTION TO STATISTICS

Credit hrs: 3(3-0)

Unit 1. What is Statistics?

Unit 2. Presentation of Data
Introduction, basic principles of classification and Tabulation, Constructing of a frequency distribution, Relative and Cumulative frequency distribution, Diagrams, Graphs and their Construction, Bar charts, Pie chart, Histogram, Frequency polygon and Frequency curve, Cumulative Frequency Polygon or Ogive, Historigram, Ogive for Discrete Variable. Types of frequency curves. Exercises.

Unit 3. Measures of Central Tendency
Introduction, Different types of Averages, Quantiles, The Mode, Empirical Relation between Mean, Median and mode, Relative Merits and Demerits of various Averages. properties of Good Average, Box and Whisker Plot, Stem and Leaf Display, definition of outliers and their detection. Exercises.

Unit 4. Measures of Dispersion

Unit 5. Probability and Probability Distributions
Discrete and continuous distributions: Binomial, Poisson and Normal Distribution. Exercises

Unit 6. Sampling and Sampling Distributions
Introduction, sample design and sampling frame, bias, sampling and non sampling errors, sampling with and without replacement, probability and non-probability sampling, Sampling distributions for single mean and proportion, Difference of means and proportions. Exercises.

Unit 7. Hypothesis Testing
Introduction, Statistical problem, null and alternative hypothesis, Type-I and Type-II errors, level of significance, Test statistics, acceptance and rejection regions, general procedure for testing of hypothesis. Exercises.

Unit 8. Testing of Hypothosis- Single Population
Introduction, Testing of hypothesis and confidence interval about the population mean and proportion for small and large samples, Exercises

Unit 9. Testing of Hypotheses- Two or more Populations
Introduction, Testing of hypothesis and confidence intervals about the difference of population means and proportions for small and large samples, Analysis of Variance and ANOVA Table. Exercises

Unit 10. Testing of Hypothesis- Independence of Attributes

Unit 11. Regression and Correlation
