PREFACE

Curriculum development is a highly organized and systematic process and involves a number of procedures. Many of these procedures include incorporating the results from international research studies and reforms made in other countries. These studies and reforms are then related to the particular subject and the position in Pakistan so that the proposed curriculum may have its roots in the socio-economics setup in which it is to be introduced. Hence, unlike a machine, it is not possible to accept any curriculum in its entirety. It has to be studied thoroughly and all aspects are to be critically examined before any component is recommended for adoption.

In exercise of the powers conferred by sub-section (1) of section 3 of the Federal Supervision of Curricula Textbooks and Maintenance of Standards of Education Act 1976, the Federal Government vide notification No. D773/76-JEA (cur.), dated December 4th, 1976, appointed the University Grants Commission as the competent authority to look after the curriculum revision work beyond class XII at the bachelor level and onwards to all degrees, certificates and diplomas awarded by degree colleges, universities and other institutions of higher education.

In pursuance of the above decisions and directives, the Higher Education Commission (HEC) is continually performing curriculum revision in collaboration with universities. According to the decision of the special meeting of Vice-Chancellor’s Committee, the curriculum of a subject must be reviewed after every 3 years.

A committee of experts comprising of conveners from the National Curriculum Revision of HEC in Basic, Applied Social Sciences and Engineering disciplines met in April 2007 and developed a unified template to standardize degree programs in the country to bring the national curriculum at par with international standards, and to fulfill the needs of the local industries. It also aimed to give a basic, broad based knowledge to the students to ensure the quality of education. The new BS degree shall be of 4 years duration, and will require the completion of 130-136 credit hours. For those social sciences and basic sciences degrees, 63.50% of the curriculum will consist of discipline specific courses, and 36.50% will consist of compulsory courses and general courses offered through other departments.

For the purpose of curriculum revision various committees are constituted at the national level, comprising of senior teachers nominated by universities, degree awarding institutions, R&D organizations and respective accreditation councils. The National Curriculum Revision Committee for International Relations in a meeting held on June16-17, 2008 at HEC Islamabad in continuation of its earlier meeting held on
April 29-30, 2008 at HEC Regional Centre, Karachi revised the curriculum in light of the unified template. The final draft prepared by the National Curriculum Revision Special Committee, duly approved by the competent authority, is being circulated for implementation in the concerned institutions.

    *Member*  
    **Assistant Professor**  
    Department of International Relations  
    National University of Modern Languages  
    Islamabad

14. **Dr. Nasrullah Mirza**  
    *Secretary/Member*  
    **Assistant Professor**  
    Department of Defense & Strategic Studies  
    Quaid-i-Azam University  
    Islamabad
Before the start of formal proceedings, *fateha* was offered for departed soul of Professor Javed Ahmad Sheikh, former Chairman, Department of Political Science, Government College University, Lahore. His services for the subject as the Chairman Curriculum Committee 2002 were highly appreciated.

In this regard, it was unanimously suggested and requested that the CRCM in International Relations should write a condolence letter to his family. Moreover, it was recommended that a three member delegation comprising of the Convener, Secretary NCRC in International Relations as well as the Deputy Director (Curri) should visit his house at Lahore to present a certificate of appreciation/shield in recognition of the meritorious services of late Prof. Javed Ahmed Sheikh.

Afterwards, Mr. Muhammad Rafiq Rai, Incharge, HEC Regional Centre, Karachi welcomed the participants. Mr. Shafiullah Khan, Assistant Director (Curriculum) HEC briefed the participants about BS (4-Year) program and requested them to adjust the existing curriculum according to the template / framework developed by the HEC for BS (4-Year) program.

Professor Dr. Ishtiaq Ahmad Chaudhary, and Dr. Nasrullah Mirza were unanimously elected by the members NCRC to act as the Convener and the Secretary respectively. Thereafter, the Curriculum Revision Committee Meeting (NCRC) on the first day thoroughly re-examined the existing curriculum of International Relations and suggested and recommended a number of changes and courses for the new latest curriculum.

After two days of thorough discussion the draft of the scheme of studies along with detailed outlines of Foundation and Major courses was prepared.

It was decided that the draft shall be sent to members of the Committee for discussion with their respective colleagues and prepare recommendations for the second meeting to finalize the draft.

The final and 2nd meeting started with recitation from the Holy Quran. On the 1st day of the meeting, framework and scheme of studies of BS (4 Year) program in IR was finalized in the light of the recommendations and suggestions of the members of the committee. The members were then requested to develop objectives, course outlines and suggest latest reading materials etc of each course as per HEC format. On the 2nd day, final draft curriculum was prepared which was sent by email to all members. It was also decided that after thoroughly checking the final draft, the Convener would send it to Mr. Shafiullah Khan, Assistant Director (curr), HEC for composing and printing.
Objectives

Main purpose of the program of BS 4-Year in International Relations is to prepare graduates having a deep knowledge of the subject as well as ability to analyze any given situation and draw out conclusions. The syllable of the subject is designed by keeping in view the following objectives.

1. The graduates passed under this program should have a sound knowledge of the subject. For this purpose an intensive and extensive program spread over 4-Year BS in International Relation is designed.

2. Along with the knowledge of the subject they should also have a broader view of other disciplines of social as well as physical sciences. It will enable the students to interact with other branches of knowledge and strengthen their understanding of the society.

3. The graduates are to be equipped with essential tools and techniques of research. It will enable them to analyze any given situation/issue and suggest its possible solutions.

4. The graduates are to be empowered to establish and develop a viable and forceful link between theory/concepts and practice in the field for its proper implementation and utilization by the students, scholars, policy-makers and planners.

Teaching Techniques / Guidelines

The following techniques shall be used/applied during the study of the subject of International Relations at the BS level.

1. Before commencement of a course the teacher concerned shall give a detailed teaching scheme to the students. It shall comprise of the topics to be taught on weekly basis with the relevant sources of the reading materials.

2. Within four weeks after commencement of a semester, the teacher concerned shall assign the topic of the term papers / assignments to the students either individually or in groups. These term papers and assignments must be completed and submitted by the students at least four weeks before final exam. In this regard the students shall be properly guided by the concerned teacher.

3. Presentations should be made essential for all the students in the class for each course.
4. National and international simulations should be organized by the Departments concerned according to the available facilities and resources.

5. Students should also be provided the opportunities to visit various organizations and institutions involved in foreign policy making process / international relations such as Foreign Office, Parliament, UN missions, various research organizations. This will help establish a link between theory and practice of International Relations by the interaction of students with the practitioners.

6. Regular seminars, workshops and conferences should be held in the departments concerned on weekly / fortnightly / monthly basis.

1. East - West Relations:
   a. Impact of World War II on the structure of World Politics.
   b. Emergence of Super Powers, Bipolarity, East-West Confrontation, Cold War.
   e. The Disintegration of the Soviet Union.
2. Post - Cold War Era/New World Order:
   a. United Nation in the Unipolar World.
   b. Political Changes in East Europe.
   c. Russia in the Post-Soviet Setting.
   d. Emerging Regionalism and Economic Organizations i.e. EU,
      ECO, ASIAN, NAFTA, AFTA & APEC.

3. New Poles of International Power and Influence:
   a. Rise of China as a Major Power.
   b. Emergence of Japan and Germany as Economic Powers.
   c. Unification of Europe.
   d. Rise of the Asia-Pacific region.

4. Selected Global Issues:
   a. Decolonization; The Gulf War; the Bosnian Tragedy, the Kashmir
      Dispute; the Islamic Revivalism and the West; Palestinian Issue;
      US invasion in Afghanistan and Iraq.

Core Books:
   College & Wehling, Fred L., 1999.

Recommended Books:
4. Bacher, Peter R., & Gordenker Leon, The United Nations in the
5. Bagby, Wesley M., Contemporary International Problems.
6. Bidwal, Praful & Vaniel, Achin; South Asia on a Short Fuse:
   Nuclear Politics and the Future of Global Disarmament.
   Oxford: Oxford University Press, 1999
Objective:

The major purposes of this course are to provide the students with the opportunity to explore international relations in a variety of ways, and to familiarize them with the major theoretical traditions, which explain the world politics. It would enable the students to grasp the main themes of the theories that have been most influential over the past two centuries. It would also explain the recent theoretical work in world politics by providing an up-to-date survey of the foundational and anti-foundational theoretical literature. Thus the learners will be able to understand the main themes of the various theories and be able to assess their comparative strengths and weaknesses.

Contents:

1. Introduction to Theories, Paradigms, Concepts in International Relations

2. Foundational Theories
   - Realism
     a. Timeless wisdom of Realism
     b. Essentials of Realism: State, survival and self help
     c. Kinds of Realism: Structural Realism, Historical and Practical Realism, Liberal Realism
     d. Neo-Realism
   - Liberalism
     a. Liberal Debate
     b. Varieties of Liberalism: Idealism, Liberal Institutionalism and Liberal Internationalism
     c. Crisis of Liberalism
   - Marxist Theories
     a. Essential Elements of Marxist Theories
     b. World System Theory
     c. Dependensia
     d. Gramscianism
     e. Critical theory
     f. Neo-Marxism

3. Anti-Foundational Theories
   - Normative Theory
a. Cosmopolitanism  
b. Communitarianism  

- Feminist Theory  
  a. Liberal feminism  
  b. Marxist / Socialist feminism  
  c. Post-modern feminism  
  d. Stand-point feminism  

- Post-Modernism  
  a. Double-reading  
  b. Deconstructionism  

- Historical Sociology  
- Social Constructivism  

Core Books

1. Griffiths, Martin *Fifty Key Thinkers in International Relations*, London: Routledge 1999

Objectives:
Objectives of this course are to generate awareness among the students regarding the nature, evolution, development and application of International Law, upon the members of international community such as states, international institutions and individuals. This course also addresses the issue of practicability of International Law.

Contents:
1. Definition, Nature, and Scope of International Law; Binding Nature of International Law;
2. Two Schools of Thought about the reality of International Law, Islamic International Law.
3. Origin and development of International Law; theories of International Law; relationship between municipal and International Law;
4. Sources of International Law.
5. Subjects of International Law: States, individual and non-State entities.
6. States as International persons: Pre-requisites of statehood, kinds of States,
7. Recognition of State and government, Dejure and Defacto Recognition, legal effects of Recognition, Recognition of insurgency and belligerency and its impacts.
8. State Succession and its effects.
9. State Sovereignty: Acquisition of territorial sovereignty

Core Books
Recommended Books:

Objectives:
The course is designed to develop conceptual and analytical skills among the students to understand the objectives, determinants and importance of foreign policy. It also covers the patterns and approaches to the formulation of foreign policy, and actors playing role in this regard. Foreign policy making process of certain countries is included in this course as models.

Contents:
1. Importance of Foreign Policy in International Relations.
2. Principles and objectives of Foreign Policy.
3. Determinants of Foreign Policy.
4. Internal and external inputs/pressures and limitations in the formulation of Foreign Policy.
5. Approaches to the study of Foreign Policy formulation.
6. Foreign Policy Formulation Process:
• Leaders, Institutions and Process
• Foreign Policy, Media, Public Opinion and Domestic Politics
• Foreign Policy; National and Transnational Actors

7. Common Patterns in the Formulation of Foreign Policies.
8. Various Strategies for the achievement of the aims and objectives of Foreign Policy.
9. Foreign Policy Formulation and the Political Systems
10. Foreign Policy Formulation in USA, China, Iran, Turkey and Pakistan

Core Books:

Recommended books:
Objectives:
The course is designed to provide students with an introduction to some of the mainstream, as well as critical, approaches to the study of international political economy (IPE), comparative political economy and the emerging literature on globalization. It examines the basic presuppositions of different approaches to IPE, and the ways in which these give rise to the basic analytic puzzles and research strategies characteristic of that approach. It begins with an overview of the classic and modern conceptions of the main schools of IPE thought: liberalism, mercantilism, and Marxism. These perspectives provide the theoretical basis for approaching the wide range of topics that IPE seeks to address.

Contents:
1. The Field of International Political Economy
   a. Definition
   b. Evolution
   c. Interests and Institutions in IPE
2. Theories of International Political Economy
   a. Economic Internationalism/Liberalism
   b. Economic Nationalism/Mercantilism
   c. Marxism/Structuralism/Dependency Theories
3. Politics of International Trade: Multilateral Trade System
   a. Nature
   b. Evolution
   c. Role and Impact of Trade Institutions: GATT & WTO
4. Politics of International Finance: Monetary System
   a. Nature
   b. Evolution
   c. Role and Impact of Financial Institutions: WB & IMF
5. International Investment: Role of Multinational Corporations
   a. Nature
   b. Evolution
   c. Influence of MNC’s in IR
6. Issues of Development
   a. North South Gap
7. Recent Developments in IPE
   a. Economic Integration
   b. Revival of Economic Nationalism
c. Neo-Imperialism,
d. Globalization

<tr>
<th>Semester- VI</th>
<th>International and Regional Organizations</th>
<th>03 Cr. hrs.</th>
</tr>
</thead>
</table>

Objectives:
The course is designed to critically evaluate the emerging role of international and regional organizations, United Nations system and the question of its restructuring as a considerable issue in the 21st century. Globalization and regionalism is leading to establishment of more new organizations in the present scenario. The effects of 9/11 and terrorism on various international and regional organizations is an important aspect of the outline. The past, present and future of organizations will be discussed in order to educate the students regarding their changing role in rising multi polarity in the global politics.

Contents:
1. Origin and Development of International Organizations
• Definitions and Historical Perspective
• League of Nations
• Multilateralism in the 20th Century: Challenges of Global Governance
• Types of International Organizations
  a. Classified by Parties
  b. Classified by Purpose
  c. Classified by Powers

2. Theoretical Perspectives of International Organizations
  a. Liberalism
  b. Realism
  c. Constructivism
  d. Critical Theories
  e. Theories of Organizations

3. The United Nations System
• History of the United Nations
• The UN Charter: Purposes and Principles
• The Principal Organs of UN: Composition, Functions and Decision-Making Process
  a. Security Council
  b. General Assembly
  c. Economic and Social Council
  d. Trusteeship Council
  e. Secretariat
  f. International Court of Justice
• Membership, Voting, Domestic jurisdiction, role of the General Assembly
• Collective Security, enforcement action and Preventive Diplomacy
• A brief introduction of some UN programmes, funds and specialized agencies
  a. International Labour Organization (ILO)
  b. Bretton Woods Institutions: IMF, World Bank, IBRD
  c. World Health Organization
• International Atomic Energy Agency (IAEA)
• Organization for the Prohibition of Chemical Weapons (OPCW)

4. Status of UN in Post 9/11 Scenario
UN and War on Terror
  a. UN and Iraq War

5. UN Reforms and Its Expansion
a. Viewpoint of super powers and regional powers regarding its expansion
b. UN Expansion- Implications for Pakistan

a. Formation, organizational setup and purposes
b. Expansion of NATO
c. NATO's major achievements and its role in 21st century

7. European Union (EU)
a. Historical background and organizational setup
b. Advent of Euro currency
c. EU’s reform policies
d. Common foreign and security policy

8. The African Union (AU)
a. Foundation, organization and purposes
b. Achievements and failures

9. Association of South East Asian Nations (ASEAN)
a. Formation, organization and purposes
b. Major Achievements and future prospects

10. Organization of Islamic Conference (OIC)
Formation, organization and purposes
a. OIC role in coping with challenges facing the Muslim World
b. OIC in post 9/11 period

Core Text:

Suggested Readings:

- Bennett, L.A International Organizations: *Principles and Eaglewood Cliffs*.
- Inis L. Claud, JR., Swords in to Plowshares: *The Problems and progress of International Organizations*.
Objectives:
The purpose of this course is to introduce the students with the practice of research in social sciences, especially in the field of international relations. It is about three main phases: the planning, the execution and the reporting in which the course has been devised. It explores the issues and processes to facilitate the preparation of research projects. However, it would also develop the skills that will help the students in using the library and computer for locating and sourcing reliable information; analyzing and evaluating other’s work; drawing on others to form, support and extend their own opinions; in documenting their sources; and lastly, learning scholarly communication in research and academics.

1. Introduction to Research
   a. Human Inquiry and Science
   b. Role and Importance of Research
   c. Paradigms, Theory and Social Research
   d. Ethics and Political Research

2. Classification of Research
   a. Basic/ Applied Research
   b. Historical
   c. Explanatory
   d. Descriptive
   e. Explanatory

3. Theory Building: Concepts and Hypotheses
   a. The nature of IR Theory
   b. The logic of Theory Building
   c. Components of IR Theory
   d. Theory testing and elaboration
   e. The Role of Hypotheses
   f. Formulation of Hypotheses
   g. The Formulation of Theory
   h. The Operationalization of theory
   i. The Selection of appropriate research technique

4. Structuring of Research
   a. The Research Process
   b. Planning the Research
   c. Research Instruments
   d. Research Information
   e. Preparing Research Proposals and Research Designs
   f. Defining a Research Problem
g. Reviewing the Literature
h. Internet and Political Research
i. Scholarly Communication

Core Texts:

Suggested Readings

| Semester- VIII | Public International Law – II | 03 Cr. Hrs. |

Objectives:

This course is the continuation of the International Law-I. Its purpose is to give an understanding to the students regarding the legal framework for mutual interaction of the states, both in times of peace and war. It also covers the legal issues of individuals such as nationality, asylum, extradition etc.

Contents:

1. Individuals in International Law: Nationality, Conflict of Nationality Laws, Acquisition and Loss of Nationality.
2. International Humanitarian Law.
3. Extradition: Conditions and States’ practice, offences exempted from extradition.
4. Asylum, Territorial and Extra Territorial Asylum, Humanitarian aspect of Asylum in International Law.

8. Role of UN in solving international disputes and maintenance of international peace and good order.

9. Laws of War and Armed Conflicts; Difference between combatants and non-combatants, lawful and unlawful combatants; rights of prisoners of war; war and human rights.

10. Islamic Concept of Law of War, Rights and Duties of Belligerent parties.

11. Concept of Neutrality and Quasi-Neutrality; Difference between neutral and neutralized States; rights and duties of neutral and belligerent States.

12. International Law and the present day challenges.

Note: References to Islamic teachings to be made whenever necessary

<table>
<thead>
<tr>
<th>Semester-VI</th>
<th>Diplomacy-I</th>
<th>03 Cr Hrs</th>
</tr>
</thead>
</table>

**Objectives:**
Diplomacy is an important means by which states execute policies. It is largely designed to enable states to secure the objective of their foreign policies by interacting with the other states preferably without a resort to force in war. The main purpose of this course is to acquaint the students not only about the linkage between foreign policy and diplomacy of a country but also to teach them about the means and methods of achieving the aims and objectives of foreign policy through various kinds of diplomacy. In addition, important matters related to diplomacy will be covered in the course in its theoretical and applied dimensions.

**Contents:**
1. Origin and Evolution of Diplomacy
3. The linkage between Foreign Policy and Diplomacy.
4. Types of Diplomacy: Old versus New Diplomacy; Open versus Secret, Formal versus Informal
5. Kinds of Diplomacy: Summit Diplomacy, Conference Diplomacy, Preventive Diplomacy, Quiet/Silent Diplomacy, Gunboat Diplomacy, Islamic Approach to Diplomacy
6. Multi-track Diplomacy
7. Modes of Diplomacy: Unilateral, Bilateral, and Multilateral
8. Informal Channels of Diplomacy: Media and NGOs
9. Classification of Diplomats
10. Functions and Role of Diplomats
11. Diplomatic privileges and immunities

**Core Books:**

**Recommended Books:**

**Objectives:**

This course is primarily about developing a broadly applicable and eclectic purview of conflict and peace. It is not just theory-oriented discourse but also includes some practical skills for handling conflict as these have been developed by practitioners in various contexts of conflicts. We will also devote weekly debate/discussion sessions to relate the course content to their own experience and knowledge and to develop their own ideas will also be arranged.

**Contents:**

1. Defining Conflict and its Sources
   a. Definition and Nature of Conflict
   b. Systemic Sources
   c. Societal Sources
   d. Bureaucratic and Organizational Sources
2. Basic and Complex Level of Analysis
   a. The Individual Level
   b. The Group Level
   c. The State Level
   d. The Decision Making Level
   e. The Ideological, Social and Economies Levels

3. Typologies of Conflict
   a. Low Intensity Conflict
   b. High Intensity Conflict
   c. International Conflict
   d. Non-International Conflict

4. Basics of Conflict Resolution
   a. Conflict Resolution between States
   b. Conflict Resolution in Civil Wars
   c. Conflict Resolution in State Formation

5. Techniques of Conflict Resolution
   b. Facilitation
   c. Good Offices
   d. Mediation in International Relations.
   e. Commission of Enquiry
   f. Conciliation
   g. Arbitration
   h. Adjudication
   i. Improvements in the Bargaining Strategies.

6. Conflict Prevention and Preemption:
   a. From Prevention to Preemption
   b. Confidence Building Measures
   c. Preventive Diplomacy

7. Case Studies:

**Suggested Readings**

Objectives:
This course is designed to examine the philosophical and political bases of international human rights movements, probing the ongoing debate over universality, culture and human rights. It introduces the systems for human rights protection and promotion. It also aims at analyzing conflict and promoting peace and justice.

Contents:
1. Conceptual Framework of Human Rights:
6. The Rights of the People: the Rights under International Law. The Rights to Development, the Rights of Peoples and Individuals, Conflict or Harmony.
10. Refugee and Immigrant Laws.

Objectives:
Population growth, technological innovation, and human industrial activity have brought about significant changes in our planet's natural environment. Some of these, such as urban air and water pollution, are highly visible in their effects; others, such as global warming or ozone depletion are less so. In recent years, understanding of the nature and extent of these changes has increased in leaps and bounds, giving rise to new and exciting work on the global environment. This course seeks to tap into different perspectives and ideas from areas as diverse as international relations theory, economics, the natural sciences and sustainable development theory, focusing on the political factors which underlie the way we view the global environment. The aim of this course is to foster an understanding of the characteristics of the global environment, the key problems we face, and the different courses of action available to us in order to achieve a more sustainable international society. In particular, it focuses on some of the key debates driving international policy making in this area, notably the relationship between developed and less developed countries, and how to translate environmental ideals into policy.

Contents:
1. Introduction
   a. Radical and reformist versions of environmentalism
   b. Environment as a global issue
   c. Environment as a political issue
2. Environmental Issues
   a. Air and Water Pollution
   b. Ozone Depletion
   c. Global Warming
   d. Biodiversity
3. Sustainability and Environmental Ideology
   a. Techno-centric and eco-centric approaches to environmentalism
   b. Environmentalism and the economy
   c. Trade, environment and sustainable development
4. The International Politics of the Environment
   a. Drive towards internationalism
   b. Nature of international environmental regimes
   c. International Treaties
   d. Difficulties of inter-state cooperation
e. Third World development and environment

5. International Political Economy and the Environment
   a. Trade and the Environment
   b. Transnational investment and the Environment
   c. Global Development Finance and the Environment

   a. Declarations and recommendations of the conference
   b. Creation of the UN Environment Programme (UNEP).
   c. Legacy of the Stockholm Conference

7. Ozone Politics
   b. Development and implementation of the Ozone regime.

8. The 1992 Rio Conference and its Outcomes
   a. The UNCED Agreements
   b. Implementation and development of the Rio Conventions.
   c. Agenda 21: Promoting sustainable development.

9. Climate Change Politics
   a. 1992 framework conventions on climate change.
   b. 1997 Kyoto Protocol
   c. Rio plus 10; Johannesburg summit, 2002

10. Environmental Problems as Security Issues:
    a. Relating environmental problems to security
    b. Environmental security and sustainable development

11. The Development and Implementation of Environmental Regimes.
    a. Agenda formation
    b. Negotiation and decision-making
    c. Implementation
    d. Further development.

12. Challenges of Implementation, Compliance and Effectiveness:
    a. Assessing implementation, compliance and effectiveness
    b. Factors affecting implementation and compliance
    c. Determinants of environmental effectiveness.

   d. Foreign policy of Pakistan and challenges
e. Futuristic outlook of Pakistan

Books Recommended

ISLAMIC STUDIES
(Compulsory)

Objectives:
This course is aimed at:
1. To provide Basic information about Islamic Studies
2. To enhance understanding of the students regarding Islamic Civilization
3. To improve Students skill to perform prayers and other worships
4. To enhance the skill of the students for understanding of issues related to faith and religious life.

Detail of Courses

Introduction to Quranic Studies
1) Basic Concepts of Quran
2) History of Quran
3) Uloom-ul -Quran

Study of Selected Text of Holly Quran
1) Verses of Surah Al-Baqra Related to Faith (Verse No-284-286)
2) Verses of Surah Al-Hujrat Related to Adab Al-Nabi (Verse No-1-18)
3) Verses of Surah Al-Mumanoon Related to Characteristics of faithful (Verse No-1-11)
4) Verses of Surah Al-Furqan Related to Social Ethics (Verse No.63-77)
5) Verses of Surah Al-Inam Related to Ihkam (Verse No-152-154)

Study of Sellected Text of Holly Quran
1) Verses of Surah Al-Ihzab Related to Adab al-Nabi (Verse No.6,21,40,56,57,58.)
2) Verses of Surah Al-Hashar (18,19,20) Related to thinking, Day of Judgment
3) Verses of Surah Al-Saf Related to Tafakar, Tadabar (Verse No-1,14)

Seerat of Holy Prophet (S.A.W) I
1) Life of Muhammad Bin Abdullah (Before Prophet Hood)
2) Life of Holy Prophet (S.A.W) in Makkah
3) Important Lessons Derived from the life of Holy Prophet in Makkah

Seerat of Holy Prophet (S.A.W) II
1) Life of Holy Prophet (S.A.W) in Madina
2) Important Events of Life Holy Prophet in Madina
3) Important Lessons Derived from the life of Holy Prophet in Madina

Introduction To Sunnah
1) Basic Concepts of Hadith
2) History of Hadith
3) Kinds of Hadith
4) Uloom –ul-Hadith
5) Sunnah & Hadith
6) Legal Position of Sunnah

Selected Study from Text of Hadith

Introduction To Islamic Law & Jurisprudence
1) Basic Concepts of Islamic Law & Jurisprudence
2) History & Importance of Islamic Law & Jurisprudence
3) Sources of Islamic Law & Jurisprudence
4) Nature of Differences in Islamic Law
5) Islam and Sectarianism

Islamic Culture & Civilization
1) Basic Concepts of Islamic Culture & Civilization
2) Historical Development of Islamic Culture & Civilization
3) Characteristics of Islamic Culture & Civilization
4) Islamic Culture & Civilization and Contemporary Issues

Islam & Science
1) Basic Concepts of Islam & Science
2) Contributions of Muslims in the Development of Science
3) Quranic & Science

Islamic Economic System
1) Basic Concepts of Islamic Economic System
2) Means of Distribution of wealth in Islamic Economics
3) Islamic Concept of Riba
4) Islamic Ways of Trade & Commerce

Political System of Islam
1) Basic Concepts of Islamic Political System
2) Islamic Concept of Sovereignty
3) Basic Institutions of Govt. in Islam

Islamic History
1) Period of Khlaft-E-Rashida
2) Period of Ummayyads
3) Period of Abbasids

Social System of Islam
1) Basic Concepts Of Social System Of Islam
2) Elements Of Family
3) Ethical Values Of Islam

Reference Books:
1) Hameed ullah Muhammad, “Emergence of Islam” , IRI, Islamabad
2) Hameed ullah Muhammad, “Muslim Conduct of State”
3) Hameed ullah Muhammad, ‘Introduction to Islam
4) Mulana Muhammad Yousaf Islahi,”
6) Ahmad Hasan, “Principles of Islamic Jurisprudence” Islamic Research Institute, International Islamic University, Islamabad (1993)
9) Dr. Muhammad Zia-ul-Haq, “Introduction to Al Sharia Al Islamia” Allama Iqbal Open University, Islamabad (2001)
Annexure “D”

Note: One course will be selected from the following six courses of Mathematics.

COMPULSORY MATHEMATICS COURSES FOR BS (4 YEAR)

(FOR STUDENTS NOT MAJORING IN MATHEMATICS)

1. MATHEMATICS I (ALGEBRA)

Prerequisite(s): Mathematics at secondary level
Credit Hours: 3 + 0

Specific Objectives of the Course: To prepare the students, not majoring in mathematics, with the essential tools of algebra to apply the concepts and the techniques in their respective disciplines.

Course Outline:

Preliminaries: Real-number system, complex numbers, introduction to sets, set operations, functions, types of functions.
Matrices: Introduction to matrices, types, matrix inverse, determinants, system of linear equations, Cramer’s rule.

Quadratic Equations: Solution of quadratic equations, qualitative analysis of roots of a quadratic equations, equations reducible to quadratic equations, cube roots of unity, relation between roots and coefficients of quadratic equations.

Sequences and Series: Arithmetic progression, geometric progression, harmonic progression.
Binomial Theorem: Introduction to mathematical induction, binomial theorem with rational and irrational indices.
Trigonometry: Fundamentals of trigonometry, trigonometric identities.

Recommended Books:

Kaufmann JE, College Algebra and Trigonometry, 1987, PWS-Kent Company, Boston
2. MATHEMATICS II (CALCULUS)

Prerequisite(s): Mathematics I (Algebra)
Credit Hours: 3 + 0

Specific Objectives of the Course: To prepare the students, not majoring in mathematics, with the essential tools of calculus to apply the concepts and the techniques in their respective disciplines.

Course Outline:

Preliminaries: Real-number line, functions and their graphs, solution of equations involving absolute values, inequalities.
Limits and Continuity: Limit of a function, left-hand and right-hand limits, continuity, continuous functions.

Derivatives and their Applications: Differentiable functions, differentiation of polynomial, rational and transcendental functions, derivatives.
Integration and Definite Integrals: Techniques of evaluating indefinite integrals, integration by substitution, integration by parts, change of variables in indefinite integrals.

Recommended Books:
Thomas GB, Finney AR, Calculus (11th edition), 2005, Addison-Wesley, Reading, Ma, USA

3. MATHEMATICS III (GEOMETRY)

Prerequisite(s): Mathematics II (Calculus)
Credit Hours: 3 + 0

Specific Objectives of the Course: To prepare the students, not majoring in mathematics, with the essential tools of geometry to apply the concepts and the techniques in their respective disciplines.

Course Outline:

Geometry in Two Dimensions: Cartesian-coördinate mesh, slope of a line, equation of a line, parallel and perpendicular lines, various forms of equation of a line, intersection of two lines, angle between two lines, distance between two points, distance between a point and a line.
Circle: Equation of a circle, circles determined by various conditions, intersection of lines and circles, locus of a point in various conditions. 
Conic Sections: Parabola, ellipse, hyperbola, the general-second-degree equation

Recommended Books:
Kaufmann JE, College Algebra and Trigonometry, 1987, PWS-Kent Company, Boston

4. COURSE FOR NON-MATHEMATICS MAJORS IN SOCIAL SCIENCES

Title of subject: MATHEMATICS
Discipline: BS (Social Sciences).
Pre-requisites: SSC (Metric) level Mathematics
Credit Hours: 03 + 00
Minimum Contact Hours: 40
Assessment: written examination;
Effective: 2008 and onward

Aims: To give the basic knowledge of Mathematics and prepare the students not majoring in mathematics.

Objectives: After completion of this course the student should be able to:
- Understand the use of the essential tools of basic mathematics;
- Apply the concepts and the techniques in their respective disciplines;
- Model the effects non-isothermal problems through different domains;

Contents:
roots of quadratic equations, equations reducible to quadratic equations. **Sequence and Series:** Arithmetic, geometric and harmonic progressions. **Permutation and combinations:** Introduction to permutation and combinations, **Binomial Theorem:** Introduction to binomial theorem. **Trigonometry:** Fundamentals of trigonometry, trigonometric identities. **Graphs:** Graph of straight line, circle and trigonometric functions.

2. **Statistics:** **Introduction:** Meaning and definition of statistics, relationship of statistics with social science, characteristics of statistics, limitations of statistics and main division of statistics. **Frequency distribution:** Organisation of data, array, ungrouped and grouped data, types of frequency series, individual, discrete and continuous series, tally sheet method, graphic presentation of the frequency distribution, bar frequency diagram histogram, frequency polygon, cumulative frequency curve. **Measures of central tendency:** Mean medium and modes, quartiles, deciles and percentiles. **Measures of dispersion:** Range, inter quartile deviation mean deviation, standard deviation, variance, moments, skewness and kurtosis.

**Books Recommended:**

5. **MATHEMATICS FOR CHEMISTRY**

**Credit Hours:** 3

**Prerequisites:** Mathematics at Secondary level

**Specific Objectives of Course:** To prepare the students not majoring in mathematics with the essential tools of Calculus to apply the concepts and the techniques in their respective disciplines.
Course Outline:

**Recommended Books:**

6. **MATHEMATICS FOR PHYSICS**

**Contents**

1. Preliminary calculus.
   - Differentiation
     - Differentiation from first principles; products; the chain rule; quotients; implicit differentiation; logarithmic differentiation; Leibnitz’ theorem; special points of a function; theorems of differentiation.
   - Integration
     - Integration from first principles; the inverse of differentiation; integration by inspection; sinusoidal function; logarithmic integration; integration using partial fractions; substitution method; integration by parts; reduction formulae; infinite and improper integrals; plane polar coordinates; integral inequalities; applications of integration.
2. **Complex numbers and hyperbolic functions**
   - The need for complex numbers
   - Manipulation of complex numbers
     - Additions and subtraction; modulus and argument; multiplication; complex conjugate; division
   - Polar representation of complex numbers
     - Multiplication and division in polar form
   - de Moivre’s theorem
     - Trigonometrical identities; finding the nth roots of unity; solving polynomial equations
   - Complex logarithms and complex powers
   - Applications to differentiation and integration
   - Hyperbolic functions
     - Definitions; hyperbolic-trigonometric analogies; identities of hyperbolic functions; solving hyperbolic equations; inverses of hyperbolic functions; calculus of hyperbolic functions

3. **Series and limits**
   - **Series**
   - **Summation of series**
     - Arithmetic series; geometric series; arithmetico-geometric series; the difference method; series involving natural numbers; transformation of series
   - **Convergence of infinite series**
     - Absolute and conditional convergence; convergence of a series containing only real positive terms; alternating series test
   - **Operations with series**
   - **Power series**
     - Convergence of power series; operations with power series
   - **Taylor series**
     - Taylor's theorem; approximation errors in Taylor series; standard Maclaurin series
   - **Evaluation of limits**

4. **Partial differentiation**
   - **Definition of the partial derivative**
   - **The total differential and total derivative**
   - **Exact and inexact differentials**
• Useful theorems of partial differentiation
• The chain rule
• Change of variables
• Taylor’s theorem for many-variable functions
• Stationary values of many-variable functions
• Stationary values under constraints

5. **Multiple integrals**
• Double integrals
• Triple integrals
• Applications of multiple integrals
  Areas and volumes; masses, centers of mass and centroids;
  Pappus’ theorems; moments of inertia; mean values of functions
• Change of variables in multiple integrals
  Change of variables in double integrals;

6. **Vector algebra**
• Scalars and vectors
• Addition and subtraction of vectors
• Multiplication by a scalar
• Basis vectors and components
• Magnitude of a vectors
• Multiplication of vectors
  Scalar product; vector product; scalar triple product; vector triple product
• Equations of lines and planes
  Equation of a line; equation of a plane
• Using vectors to find distances
  Point to line; point to plane; line to line; line to plane
• Reciprocal vectors

7. **Matrices and vector spaces**
• Vectors spaces
  Basic vectors; the inner product; some useful inequalities
• Matrices
• The complex and Hermitian conjugates of a matrix
• The determinant of a matrix
  Properties of determinants
• The inverse of a matrix
• The rank of a matrix
• Simultaneous linear equations
  N simultaneous linear equations in N unknowns
• Special square matrices
Diagonal; symmetric and antisymmetric; orthogonal; Hermitian; unitary normal

- Eigen vectors and eigen values of a normal matrix; of Hermitian and anti-Hermitian matrices; of a unitary matrix; of a general square matrix
- Determination of eigen values and eigen vectors degenerate eigen values

8. Vector calculus

- Differentiation of vectors
  Composite vector expressions; differential of a vector
- Integration of vectors
- Space curves
- Vector functions of several arguments
- Surfaces
- Scalar and vector fields
- Vector operators
  Gradient of a scalar field; divergence of a vector field; curl of a vector field
- Vector operator formulae
  Vector operators acting on sums and products; combinations of grad, div and curl
- Cylindrical and spherical polar coordinates
  Cylindrical polar coordinates; spherical polar coordinates
INTRODUCTION TO STATISTICS

Credit hrs: 3(3-0)

Unit 1. What is Statistics?

Unit 2. Presentation of Data
Introduction, basic principles of classification and Tabulation, Constructing of a frequency distribution, Relative and Cumulative frequency distribution, Diagrams, Graphs and their Construction, Bar charts, Pie chart, Histogram, Frequency polygon and Frequency curve, Cumulative Frequency Polygon or Ogive, Historigram, Ogive for Discrete Variable. Types of frequency curves. Exercises.

Unit 3. Measures of Central Tendency
Introduction, Different types of Averages, Quantiles, The Mode, Empirical Relation between Mean, Median and mode, Relative Merits and Demerits of various Averages, properties of Good Average, Box and Whisker Plot, Stem and Leaf Display, definition of outliers and their detection. Exercises.

Unit 4. Measures of Dispersion

Unit 5. Probability and Probability Distributions
Discrete and continuous distributions: Binomial, Poisson and Normal Distribution. Exercises

Unit 6. Sampling and Sampling Distributions
Introduction, sample design and sampling frame, bias, sampling and non sampling errors, sampling with and without replacement, probability and non-probability sampling, Sampling distributions for single mean and proportion, Difference of means and proportions. Exercises.
Unit 7. **Hypothesis Testing**
Introduction, Statistical problem, null and alternative hypothesis, Type-I and Type-II errors, level of significance, Test statistics, acceptance and rejection regions, general procedure for testing of hypothesis. Exercises.

Unit 8. **Testing of Hypothesis- Single Population**
Introduction, Testing of hypothesis and confidence interval about the population mean and proportion for small and large samples, Exercises

Unit 9. **Testing of Hypotheses-Two or more Populations**
Introduction, Testing of hypothesis and confidence intervals about the difference of population means and proportions for small and large samples, Analysis of Variance and ANOVA Table. Exercises

Unit 10. **Testing of Hypothesis-Independece of Attributes**

Unit 11. **Regression and Correlation**

**Recommended Books**

---

**Note:** General Courses from other Departments

Details of courses may be developed by the concerned universities according to their Selection of Courses as recommended by their Board of Studies.
