PREFACE

The curriculum, with varying definitions, is a plan of the teaching-learning process that students of an academic programme are required to undergo. It includes objectives and learning outcomes, course contents, scheme of studies, teaching methodologies and methods of assessment of learning. Knowledge in all academic disciplines is expanding and even new disciplines are also emerging, it is imperative that curriculum are developed and revised regularly.

University Grants Commission (UGC) was designated as the competent authority to develop, review and revise curricula beyond Class-XII vide Section 3, Sub-Section 2 (ii), Act of Parliament No. X of 1976 titled “Supervision of Curricula and Textbooks and Maintenance of Standard of Education”. With the repeal of UGC Act, the same function was assigned to the Higher Education Commission (HEC) under its Ordinance of 2002, Section 10, Sub-Section 1 (v).

In compliance with the provisions, the Curriculum Division of HEC undertakes the revision of curricula after every three years through respective National Curriculum Revision Committees (NCRCs) which consist of eminent professors and researchers of relevant fields from public and private sector universities, R&D organizations, councils, industry and civil society nominated by their organizations.

In order to impart education at par with quality international standards, HEC NCRCs have developed unified templates as guidelines for the development and revision of curricula in the disciplines of Basic Sciences, Applied Sciences, Social Sciences, Agriculture and Engineering in 2007 and 2009.

It is hoped that this curriculum document, prepared by the respective NCRC’s, would serve the purpose of meeting our national, social and economic needs, and it would also provide the level of competency specified in Pakistan Qualification Framework to make it compatible with international educational standards. The curriculum is also placed on the website of HEC (www.hec.gov.pk).

MINUTES OF THE FINAL MEETING OF NCRC IN HEALTH AND PHYSICAL EDUCATION

The final meeting of the National Curriculum Revision Committee (NCRC) was held on 7-9th May, 2014 in the Committee Room of HEC Regional Center, Peshawar, to develop unified, comprehensive and standardized curriculum for BS (4-years) and MPhil/MS (Sport Sciences & Physical Education). Prof. Dr. Abdul Waheed Mughal, (Convener) Dean, Faculty of Arts, Social Sciences & Education, Sarhad University of Science & Information Technology, Peshawar chaired the meeting. The Following were present in the meeting:

13 Dr. Ejaz Asghar, Associate Professor/Chairman, Department of Physical Education & Sports Sciences, Riphah International University, Faisalabad. Member
14 Mr. Badar Habib, Lecturer, The Islamia University of Bahawalpur Member

The meeting started with the recitation from the Holy Quran by Mr. Zainullah Janan. Director General (Academics), HEC, welcomed the participants and requested them to present their brief introduction. After formal introduction, the Director General (Academics) briefed the participants about the importance of such gatherings which has the aim to improve the educational standards in the country and also contribute towards social uplift of the society and betterment of the student community. He added that holding of such meetings in other subjects, is a regular feature of HEC, and it is the responsibility of all the experts/educationists to realize its importance and contribute effectively to this national cause, by incorporating the latest trends and demands of their relevant subjects. He also asked the members to recommend/submit curriculum based training workshop proposals in Sports Sciences & Physical Education in all four provinces and AJK to create awareness regarding changes/modifications made in the curricula during the three-day meeting.

After detailed guideline delivered by Director General (Academics), the Committee, thoroughly discussed the courses, their credit distribution and
contents for both BS (4-years) and MS-Sports Sciences (2-years) Programs.

Since, Mr. Javaid Akhtar (Former Secretary) elected during the last meeting of NCRC held at Lahore could not attend the meeting due to his pre-occupation, the members unanimously requested Prof. Dr. Salahuddin Khan to act as Secretary of the committee.

After three days of intensive and detailed discussion, the committee finalized the courses/contents recommending latest books for all the subjects. It is pertinent to mention here that different sub-committees were formed unanimously, who were given the task to revise different subjects of their respective areas/fields. The intensive work done by different specialized Committees were appreciated by all the members.

One of the major outcomes of three days deliberations was to broaden the scope of practical classes of Physical Education, by spreading the practical work in four semesters which was earlier confined to only one semester. This proposal/recommendation was widely hailed by all the members.

After discussion and detailed deliberation, the committee unanimously made following recommendations for BS (4 years) and MS (2 years) programs.

**Recommendation for BS (4 years)**

- Teacher, being the key person in the learning process, it is imperative that he/she should be aware of the latest developments in the field of Sports and Physical Education. In order to ensure the implementation of the suggestion, it is strongly recommended that Higher Education Commission may hold refresher courses in coordination with Pakistan Sport Board/National Council for Health & Physical Education & Sport Sciences of Pakistan (NCPESS), regularly.

- Higher Education Commission may provide financial assistance to ensure the implementation of BS (4-years) Programs throughout the country.

- The linkage in both teaching and research disciplines needs to be encouraged between the universities and sports departments.

- To implement the BS (4-Years) program, the Government and Universities need to provide additional facilities for teaching extra courses and for provision of latest equipment.

- The Provinces need to be involved at the highest level for the implementation of BS (4-Years) program.
• Current Nomenclature of Physical Education discipline may be changed/replaced by Sports Sciences and Physical Education instead of Health and Physical Education, as being used globally.

• The committee unanimously resolved that HEC may arrange meetings of the said Committees at least after two years to review the courses and problems faced by the departments during the running semesters.

• The committee also strongly recommended that the changes which are made in the practical duration may be communicated to the concerned quarters for implementation.

For M.Phil/MS (2-years) program the following recommendations were made:

Prof. Dr. Abdul Waheed Mughal presented a Scheme of Studies for MS Sports Sciences and Physical Education being implemented in SUIT, approved by its competent statutory bodies in accordance with the prevailing HEC guidelines, covering all aspects of eligibility, duration, core/optional courses, marks distribution, etc. The proposed scheme of studies of MS Program was appreciated by all the committee members and recommended for adoption by HEC, which is being forwarded to HEC for further implementation. The committee also recommended the following:

• The Committee unanimously proposed maximum new subjects for MS/MPhil course work as guidelines for the universities offering MS/MPhil Sports Sciences Programs in Physical Education.

• Research, being an important component of the MS/MPhil Programs be given due importance and the HEC may provide all possible assistance to the newly established departments of Physical Education in the universities of different provinces and AJK, imparting such education.

• More opportunities of trainings, refresher courses, workshops, etc; be given to the faculty members of the universities offering M. Phil Programs and HEC may extend maximum support in realizing the above objectives.

• Efforts should be made to build working relationship among the sister universities offering the research programs in same filed.

• A mechanism should be developed to bring uniformity among the departments offering MS/MPhil Programs through HEC.
- Research labs and testing centers be established in all the universities offering post graduate programs in sports sciences and Physical Education for which the finance expenditure may be provided on matching grant basis.

- The HEC may arrange visits of teaching faculty holding PhD degree in sports sciences and Physical education from developed countries for two to three weeks’ time to deliver lectures in their respective fields. The visiting faculty members then be deputed in all four or five universities offering post graduate program in sports sciences.

- The HEC may also facilitate these institutions by Research Journal Eboels related to sports sciences at HEC digital Library to promote research opportunities.

- The HEC may also seek the opportunities/avenues for Faculty Exchange program in sports sciences with renowned International Universities.

**General**

In this regard, the committee proposed that the NCRC members belonging to different provinces may be incorporated for organizing training workshops in their respective fields.

The Committee during the session unanimously constituted a Council for Health, Physical Education and Sports Sciences of Pakistan (NCPESS) and selected Dr. A. Waheed Mughal as its President; Dr. Salahuddin Khan, as its Convener, Dr. Ejaz Asghar, as its Secretary, and Mr. Farooq Hussain as its Treasurer, along with all other members of NCRC, as its founder Executive Members.

The NCRC recommended to the HEC that the above Council may please be provided with necessary guidelines to get the body registered with the relevant authorities through HEC.

The Committee also thanked Mr. Zaheer Ahmed Awan Mr. Rizwan Shoukat Mr. Abid Khan for their personal interest and efforts to make the meeting successful.

The meeting, later on, ended with a vote of thanks from and to the chair.
OBJECTIVES

In the era of educational revolution main objective of the BS 4-Years program in Health & Physical Education is to prepare graduates having a deep knowledge of the subjects as well as ability to analyze in a given situation and draw out conclusion. The primary aim of the program is to produce broad base graduates able to face the challenges of the modern world.

The educational objectives of BS 4-Year program are:

1. The program in Health & Physical Education is designed to produce the graduates having a sound knowledge of the theoretical and practical subject matter.

2. Along with the knowledge of the subject they would also have a broader view of other disciplines of social as well as physical sciences. It will enable the students to interact with other branches of knowledge and strengthen their understanding of the society.

3. The graduates are equipped with essential tools and techniques of research. It will enable them to analyze any given situation / issue and suggest its possible solutions.

4. The graduates are to be empowered to establish and develop a viable and forceful line between theory / concepts and practice in the field of Health and Physical Education.

5. The collective efforts behind this course are to create cohesiveness among the institutions and personnel of sports and physical education.

6. The similarity among the outlines has been developed to interrelate the discipline in the global perspective creating an environment of healthy competition and equal opportunities for all at national and international level.

DETAILS OF COURSES

TITLE OF COURSES

SOCIOLOGY (2+0 Cr. Hr)

OBJECTIVES OF COURSE
This course will bring awareness in students about the general sociological perspectives and understanding about the various levels of interactions in society through sports. Further, they will understand the interaction occur in sports activities and further will help in the origination of sports and in the resolution of various conflicts. In addition to the various other objectives, this course will specifically improve the moral and ethical background and will help in better socialization and personality development.

COURSE CONTENTS

i. INTRODUCTION
   a. Introduction to Sociology
   b. Its meaning, scope and significance
   c. Current trends of sociology

ii. SPORTS AND SOCIETY
   a. Definitions
   b. Types of societies and cultures
   c. Development of youth sports
   d. The role of sports in the development of individual and society

iii. DEVIANCE AND SOCIAL CONTROL IN SPORTS
   a. Definition of deviance and social control
   b. Types and approaches of deviance
   c. Social control through sports

iv. VIOLENCE AND SPORTS
   a. Violence in a sociological perspective
   b. The psychology of violence
   c. Violence in sports
   d. Violence on and off the field
   e. Violence among the spectators
   f. The role of sports to control the violence
v. SPORTS AND SOCIALIZATION
   a. Definitions
   b. Theories and agencies of socialization
   c. Politics in Sports
   d. Political instability and Sports

vi. SPORTS AS SOCIAL INSTITUTION
   a. Definition of social institution
   b. Sports and family
   c. Sports and religion
   d. Sports and education
   e. Sports and economic
   f. Sports as a recreational

vii. SPORTS PROBLEMS
    a. The social problems in sports
    b. Poverty, Illiteracy and sports
    c. Unemployment and sports
    d. Remedies and solution of social problems through sports

RECOMMENDED BOOKS
1. Dr. Anwar Alam 2005, Principles of Sociology, Department of Sociology, University of Peshawar.
2. Sociology-1 by Allama Iqbal Open University.
3. Sociology-II by Allama Iqbal University.
PHILOSOPHICAL BASIS OF PHYSICAL EDUCATION  (3+0 Cr. Hr)

OBJECTIVES OF COURSE
This course is designed to acquaint students with the objectives to make them understand the basic concepts of physical education and its relation to Health Education, and provide preliminary awareness about physical, mental and social developments; interpretation of biological, psychological effects on physical activities.

COURSE CONTENTS

i. INTRODUCTION
   a. Historical background of Physical Education
   b. Definition and scope of Physical Education
   c. Aims and objectives of Physical Education

ii. PHILOSOPHY AND PHYSICAL EDUCATION
   a. Definition
   b. Components of Philosophy
   c. Relationship of Physical Education with Naturalism, Idealism, Realism, Pragmatism, Extencialism

iii. PHYSICAL EDUCATION AS DISCIPLINE
   a. Physical Education, an academic discipline
   b. Physical Education and Islam
   c. Physical Education as a profession

iv. SCIENTIFIC FOUNDATION OF PHYSICAL EDUCATION
    a. Biological interpretation of Physical Education
    b. Psychological interpretation of Physical Education
    c. Sociological interpretation of Physical Education

v. PHYSICAL EDUCATION AND RECREATION
    a. Definition of Recreation
    b. Types of Recreation
    c. Principles of Leisure
    d. Outdoor pursuits

vi. LEADERSHIP IN PHYSICAL EDUCATION
    a. Definition and kinds of leadership
    b. Selection criteria of leader
    c. Qualities of a good leader
    d. Challenges in Physical Education profession
RECOMMENDED BOOKS

1. Dr. A. Waheed Mughal, Philosophical Basis of Physical Education, Islamabad 2012.
RULES AND TECHNIQUES OF GAMES  
(2+2 Cr. Hr)

OBJECTIVES OF COURSE
This course is aimed at developing the knowledge of students about rules of the sports & games along with the coaching skills of different sports among the students. The course will enhance the organizational skills in the students and knowledge regarding organization and conduct of tournament at school, college, university and National levels. It will also help the students to develop discipline, sportsmanship and polish their leadership qualities.

COURSE CONTENTS

i. INTRODUCTION
   a. Definition of Games and Sports
   b. Types of Games and Sports
   c. Values of Games and Sports

ii. SYSTEMS OF TOURNAMENT
   a. Single elimination or knockout system
   b. Round robin or league system
   c. Combination system
   d. Challenge system
      i. Ladder system
      ii. Pyramid system

iii. ORGANIZATION AND CONDUCT OF TOURNAMENTS
   a. Board level
   b. University level
   c. Provincial level
   d. National level

iv. HISTORY, RULES AND TECHNIQUES OF GAMES (RACKET)
   a. Badminton
   b. Tennis
   c. Squash
   d. Table Tennis

v. HISTORY, RULES AND TECHNIQUES OF GAMES (BALL GAMES)
   a. Basket Ball
   b. Net Ball
   c. Volleyball
   d. Handball
vi. HISTORY, RULES AND TECHNIQUES OF GAMES (FIELD GAMES)
   a. Foot Ball
   b. Hockey
   c. Cricket

RECOMMENDED BOOKS
1. Dr. A. Waheed Mughal Rules and Techniques of Games, Islamabad-2012.
3. Marshal Cavendish, Encyclopedia of Sports
6. Law of Game 2013-14 by FIFA International
BASICS OF HUMAN ANATOMY

(3+0 Cr. Hr)

OBJECTIVES OF COURSE
The outlines of this course have been drawn with the objective to provide basic knowledge of human anatomy and body parts such as head and neck, thorax, abdomen and pelvis, Skeleton, Bones Tissues, Joints and Muscles to acquaint students with initial information about human body structure and functions.

COURSE CONTENTS

i. INTRODUCTION
   a. Definition of Anatomy
   b. Importance of Anatomy in Sports
   c. Terms & terminologies used in Anatomy

ii. CELL
   a. Structure of Cell
   b. Functions and Characteristics of Cell
   c. Cell division

iii. TISSUES AND ORGANS
   a. Definition
   b. Types

iv. ANATOMY OF SKELETAL SYSTEM
v. ANATOMY OF MUSCULAR SYSTEM
vi. ANATOMY OF DIGESTIVE SYSTEM
vii. ANATOMY OF CARDIOVASCULAR SYSTEM
viii. ANATOMY OF NERVOUS SYSTEM

RECOMMENDED BOOKS
OBJECTIVES OF COURSE
The main purpose of this course is to enhance the knowledge of the students regarding Track & Field. This course will also be helpful in developing the skill of the students regarding the marking, and laying out of standard track and other circles. The students will be able to conduct the track and field competitions at various levels as well as to perform the duties of Technical officials.

COURSE CONTENTS

i. HISTORY OF ANCIENT OLYMPIC GAMES WITH SPECIAL REFERENCE TO TRACK & FIELD
   a. Brief History
   b. Terms and condition for participation
   c. Programme of activities
   d. The Olympic Flame
   e. The Decline of the Games

ii. HISTORY OF MODERN OLYMPIC GAMES WITH SPECIAL REFERENCE TO TRACK & FIELD
   a. The History behind the Modern Olympic Games
   b. List of the countries organize Olympic games
   c. Special features/detail of all time athletes
   d. The Olympic Oath
   e. The Olympic Hem
   f. IOC (international Olympic committee)

iii. LAYING OUT 200m & 400m TRACK STRAGERS

iv. CONDUCT OF TRACK AND FIELD EVENTS
   a. Preparation of Track and Field competition program (Board, University, Province, National)
   b. Formation of committees for Track and Field competition

v. OFFICIALS AND THEIR DUTIES IN TRACK AND FIELD COMPETITION

vi. RULES AND TECHNIQUES OF TRACK EVENTS

vii. RULES AND TECHNIQUES OF FIELD EVENTS

viii. RULES OF CROSS COUNTRY

ix. RULES OF WALK-RACE

x. DECATHLON, AND PENTATHLON (COMBINED EVENTS)
RECOMMENDED BOOKS

1. Dr. A. Waheed Mughal, Olympics Games & Athletics, Islamabad, 2012
3. M. Shafiq History of the Olympic Games with special reference to Athletics, Faisalabad
ROLE OF MEDIA IN SPORTS  

(3+0 Cr. Hr)

OBJECTIVES OF COURSE
Media being a powerful institution is playing very effective role in every walks of life. It is playing an important role in the propagation of sports and brining the masses closer to the glamour of sports. The course will meet the need to bring the students at home with the role of media in the mobilization of sports for the national cohesion and boasting the economy of the country through the sports as an industry. This course will help to understand the present and future trends in sports and their implications upon the national development.

COURSE CONTENTS

i. INTRODUCTION
   a. Types and Characteristics of Media
   b. Role of Media in Globalizations of Sports
   c. Mobilization through Media

ii. SPORTS AND MEDIA
   a. The Professions of Sports Journalism
   b. Sports writing and Journalism
   c. Sports Broadcasting
   d. Sports Photography
   e. Careers in Sports Media

iii. MEDIA AND INTERNATIONAL COMPETITION/GAMES (OLYMPIC, COMMONWEALTH, ASIAN AND REGIONAL GAMES)
    a. The Press Commission and Radio Commissions
    b. Facilities and Services at the games
    c. News and Entertainment

iv. SPORTS ADVERTISEMENT
    a. Sports General
    b. Sports Periodicals
    c. Sports Magazines
    d. Banners
    e. Pamphlets
    f. other mode of advertisement

v. SPORTS AND JOURNALISM
    a. Introduction
b. Images and Messages in Media Sports

c. Sports and Government

d. Media as a Source of Propagation in Sports

e. Media and the Development of Sports.

RECOMMENDED BOOKS

1. Essential of Management by Harold Koontz
2. Essentials of Marketing by Manmohan Joshi
3. Exploring Journalism by Mirza Muhammad Yousuf
4. Journalism for All by Dr. Mehd Hassan and Abdus Salam Khurshid
5. Television and Radio Broadcasting by R.C. Ramanujam
6. TV Journalism by Navodita Pande
7. Role of Media in Sports By Dr. Waheed Mughal 2015
OBJECTIVES OF COURSE
The purpose of this course is to provide knowledge about scientific coaching to maintain professionalism, fulfill the responsibilities, to manage the sports training stages, organize the training designed and mature application of teaching the well manners.

COURSE CONTENTS

1. Introduction to sports coaching
   a. Introduction and nature of coaching profession
   b. Need and importance

2. Teaching Methodology for a Coach
   a. Skill, Technique and Ability
   b. Skill Development

3. Role of a Coach
   a. Coaching Philosophy
   b. Coaching Style
   c. Coaching Ethics

4. Development of Skill Analysis and Strategies
   a. Physical Training
   b. Mental Training
   c. Tactical Training
   d. Technical Training

5. Periodization of Training
   a. Off season Training
   b. Pre-season Training
   c. Peak/in-season Training
   d. Micro cycle
   e. Macro cycle
   f. Meso cycle
   g. Warming up
   h. Cooling down

6. Components of Fitness
   a. Health related Fitness (Need, Importance & Improvement)
   b. Skill related Fitness (Need, Importance & Improvement)
   c. Training Laws and Principles

7. Coaching & Training Plans of major Games
   a. Athletics
b. Cricket
c. Hockey
d. Football
e. Volley Ball
f. Badminton
g. Basketball

Books & Reference Material
1. Dr. A.Waheed Mughal: The coaching Philosophy, Islamabad-2012
2. Dr. A.Waheed Mughal: The Theory of training, Islamabad-2013
3. Dr. A.Waheed Mughal: Science of sports training, Islamabad-2014
4. The Scientific Aspects of Sports Training; A.W.Taylor
6. Scientific Principles of Coaching; Englewood Cliff
7. Coaching Basketball; Jerry Kraus and Ralph Pim
8. Scientific Foundation of Coaching; Pate Rotella Mcclenghan
PLANNING SPORTS FACILITIES

OBJECTIVES OF COURSE
The course will be helpful in developing the knowledge of students about planning sports facilities. The course will also create awareness among the students to plan, locate, and know the size of Field House, Gymnasium, Stadium, and Swimming Pool facilities and sports Laboratories.

COURSE CONTENTS

i PLANNING PROCESS
   a. Basic Consideration
   b. Need for Area and Facilities
      i) Need for Planning
      ii) Planning Factors
      iii) Planning Units – Types and Function

ii PLANNING FOR SPORTS & PHYSICAL EDUCATION FACILITIES
   a. Major Concepts
   b. Steps in Planning Process
   c. Responsibilities of Physical Educator

iii FACILITIES FOR RESEARCH
   a. General Consideration
   b. Teaching and Research Laboratories
   c. Specific Laboratories Facilities
      i) Measurement and Evaluation
      ii) Biomechanics
      iii) Exercise Physiology
      iv) Motor Learning and Psychology Learning

iv PLANNING, LOCATION AND SIZE OF THE FOLLOWING FACILITIES
   a. Field House
   b. Stadium
   c. Gymnasium
   d. Swimming Pool
   e. Artificial Surfaces (Indoor and outdoor)

v FACILITIES FOR FACULTY AND STAFF
   a. Administrative Units
b. Essential administrative facilities
   i) Administrative Office
   ii) Faculty Offices
   iii) Audio-visual Room
   iv) Conference Rooms
   v) Locker Shower Room
   vi) Toilet and Lavatory Facilities

vi CONSERVATION AND MAINTENANCE OF SPORTS INFRASTRUCTURE
   a. Understanding of PC-I
   b. Compilation of PC-I, PC-II, PC-III

RECOMMENDED BOOKS
1. Dr. A.Waheed Mughal; Planning & Development of Sports Facilities, Islamabad-2013
2. Dr. Jahangir Khattak, Planning Facilitation, 2001, D.I.Khan
PHYSICAL EDUCATION FOR SPECIAL POPULATION (3+0 Cr. Hr)

OBJECTIVES OF COURSE
This course is designed to provide knowledge to the students about the rehabilitation of special persons through physical activities. The course will also create awareness regarding teaching methods useful for special people to adjust them in the society.

COURSE CONTENTS

i  HISTORICAL BACKGROUND OF SPECIAL POPULATIONS
   a. Concepts of Specials Populations:
      i. Dark Age
      ii. Modern Age
   b. Concept for Special Populations in our Society

ii  UNDERSTANDING OF SPECIAL POPULATION
   a. W.H.O.’s Definition and Classification of Special Population
   b. Basic Terms
   c. Public Law
   d. Posture and its Importance

iii  TYPES OF SPECIAL POPULATION
   a. Mental Retardation:
      i. Mild
      ii. Moderate
      iii. Severe
      iv. Profound
   b. Deaf and Defective
      a. Mild
      b. Moderate
      c. Severe
      d. Profound
   c. Visually Impaired
      a. Blind
      b. Partially Sighted
      c. Partially Blind
      d. Low Vision
   d. Physically Disabled
      a. Mild
      b. Moderate
c. Severe

d. Profound

Vii TEACHING PROGRAMMES FOR SPECIAL POPULATION

a. Individual Programmes
b. Developmental Programmes
c. Remedial Programmes
d. Therapeutic Programmes

viii ADJUSTMENT OF SPECIAL POPULATION

a. Factors Affecting Adjustment
b. The Effects of Environment
c. Ways of Making Adjustment
d. Adjustment of Special Populations in Society through Teachers and Parents

ix PHYSICAL ACTIVITIES FOR SPECIAL POPULATION

a. Games and Sports activities for Special Population
b. Fitness Exercises for Special Population
c. Understanding the Nature of Motor Learning
d. Movement Mechanical Principles for Special Population

x PHYSICAL EDUCATION TEACHER FOR SPECIAL POPULATION

a. Attributes of Physical Education Teacher
b. Qualifications of Physical Education Teacher

RECOMMENDED BOOKS

1. Dr. A.Waheed Mughal; Physical Education for Special Needs, Islamabad, 2013
2. Shekar, K.C. Adapted Physical Education, New Delhi: Khel Sahitya Kendra, 2005,
INTRODUCTION OF PSYCHOLOGY (3+0 Cr. Hr)

OBJECTIVES OF COURSE
The outlines of this course are drawn with the objectives to provide initial knowledge to the students on the subject relating to motor learning, personality development, stress management and its implication on athletes, coaches and organizers in terms of performance.

COURSE CONTENTS

i  INTRODUCTION
   a. Definition of Psychology
   b. Importance of Psychology in sports and Physical Education
   c. Branches of Psychology related to Sports
   d. Psychological benefits through Physical Activities

ii  BASIC PSYCHOLOGICAL CONCEPTS
   a. Definition and Theories of Learning
   b. Factors Influencing Learning
   c. Motor Learning

iii  PERSONALITY AND SPORTS
   a. Defining Personality
   b. Understanding personality structure
   c. Studying personality from five viewpoints:
      • Psychodynamic Approach
      • Trait Approach
      • Situation Approach
      • Interactional Approach
      • Phenomenological Approach
   d. Measuring personality
   e. Personality development in Sports

iv  CONCENTRATION
   a. Defining concentration
   b. Explaining attentional focus
   c. Identifying Types of attentional focus
   d. Recognizing Attentional Problems

RECOMMENDED BOOKS
1. Dr. A. Waheed Mughal: Sports Psychology, Islamabad, 2012
TEST MEASUREMENT & EVALUATION IN PHYSICAL EDUCATION AND SPORTS (3+0 Cr. Hr)

OBJECTIVES OF COURSE
The course is designed to make the students understand and use the statistical means for the research purposes. They will learn about inferential statistics using it in everyday life for the uplift of the discipline and bringing positive reforms in order to achieve the objective.

COURSE CONTENTS

i  INTRODUCTION
   a. Definitions of Test, Measurement and Evaluation
   b. Importance of Test, Measurement and Evaluation in Physical Education
   c. Basic Principles of Evaluation

ii EVALUATION AND ADMINISTRATION OF TESTS
   a. Criteria for Selecting Appropriate Test
   b. Pre test responsibilities
   c. Duties and responsibilities during Testing
   d. Post test responsibilities

iii BASIC STATISTICS
   a. Standard Deviation
   b. Normal Probability Curve
   d. Correlation
   e. Anova Test

iv MEASUREMENT OF PHYSICAL FITNESS
   a. Definition of Physical Fitness
   b. Components of Physical Fitness
   c. Physical Fitness Index
   d. Measurement of Motor Fitness

v GENERAL MOTOR ABILITY
   a. Definition of Motor Ability
   b. Measurement of Motor Ability
   c. Components of Motor Ability

vi CARDIOVASCULAR FITNESS
   a. Definition
b. Measurement of Cardiovascular Fitness  
c. Testing of Cardiovascular Fitness

**vii RATING SCALES IN PHYSICAL EDUCATION**

a. Construction of Rating Scales  
b. Rules for the use of Rating Scales  
c. Types of Rating Devices

**viii MEASUREMENT OF SPECIFIC SPORT SKILLS**

a. Hockey  
b. Football  
c. Basketball  
d. Badminton  
e. Volleyball  
f. Tennis  
g. Track & Field (one event from each group)

**RECOMMENDED BOOKS**

1. Dr. A Waheed Mughal; Test & Measurement in Physical Education, Islamabad, 2013  
RESEARCH METHODOLOGY IN PHYSICAL EDUCATION (3+0 Cr. Hr)

OBJECTIVES OF COURSE
Without any doubt research is the basic requirement for the academic promotion and development of a discipline. This basic informative course of research methods will help the students of Health, Physical Education and Sports to understand the definitions and meanings of research, use of the tools for data collection, procedures of sampling and various terminologies used in the research process. After going through the course, the students will be in a better position to pursue research projects in their respective field.

COURSE CONTENTS
i  INTRODUCTION TO RESEARCH
   a. Definition and meaning of research
   b. Characteristics of research
   c. Type of research
   d. Need and importance of research in Physical Education.

ii  NATURE OF INQUIRY
   a. The search for truth.

iii THE RESEARCH PROBLEM
   a. Identification of the problems
   b. Criteria of selecting the problems
   c. Sources for locating the problems
   d. Problems evaluation
   e. Limitations, Delimitation, Assumption

iv  RESEARCH PROPOSAL
   a. Developing the research proposal
      i) Statement of the problems
      ii) Significance of the problems
      iii) Objectives of the study
      iv) Hypotheses
      v) Procedure of the study
      vi) Limitation/delimitation and scope of study
METHODS OF RESEARCH
a. Historical research
b. Descriptive research
c. Experimental research

SAMPLING
a. Sampling
b. Types of sampling
c. Sampling procedure

TOOLS FOR DATA COLLECTIONS
a. Questionnaire
b. Interviews/Survey
c. Tests
d. Observation
e. Use of relevant and reference materials, Note taking

WRITING THE RESEARCH REPORT
a. Pattern or style of research report
b. The structure components of research report

RECOMMENDED BOOKS
1. Dr. A. Waheed Mughal; Research Methods in Physical Education, Islamabad, 2012
OBJECTIVES OF COURSE
The course is basically designed to create awareness in the perspective physical education for understanding the sports training and to develop a professional coach who can impart training under the scientific principles and in a systematic order. The course will enable the future coach to place the training processes in proper and thoughtful manner.

COURSE CONTENTS

i. SPORTS TRAINING
   Introduction, Understanding of sports training, Coach in different capacities, relationship between coach and organization, athlete and link personals, Coaching style, Qualities of a good Coach

ii. TRAINING PRINCIPLES
   Gradualness, Age Dependence, Utility, Loading/Over-Loading. Reversibility and specificity

iii. COMPONENTS OF FITNESS
   Introduction, Components their need and importance in sports

iv. FUNDAMENTAL ASPECTS AND TRAINING OF STRENGTH ABILITIES
   a. Introduction
   b. Classification of Strength:
      i). Maximum Strength
      ii). Speed Strength-Elastic Strength
      iii). Strength Endurance
      iv). Organization of Strength Training

v. FUNDAMENTAL ASPECTS AND TRAINING OF ENDURANCE
   a. Introduction, Local & general endurance types, Endurance training methods
   b. Aerobic and an aerobic endurance short, middle and long distance endurance

vi. FUNDAMENTAL ASPECTS AND SPEED TRAINING
   a. Introduction, Speed of movement
   b. Phases of running action
   c. Training Methods of speed Training

vii. WARM-UP & COOL DOWN
   a. Introduction, Kinds (General, Specific)
b. Need and Importance

c. Effects of warm-up and Cool down

viii. **LOAD (OUTER AND INNER LOAD)**

a. Introduction

b. Loading factors

c. Training methods, forms of organization and load structure

d. Load and adaptation

e. On selected principles for the arrangement of load (increasing load, continuous load).

**RECOMMENDED BOOKS**

2. The Olympic Movement by Lausanne, Switzerland, 1984 (I.O.C)

4. Training Theory, by Dr. A. Waheed Mughal, Pakistan Sports Board, 2008
SPORTS NUTRITION  

(3+0 Cr. Hr)

OBJECTIVES OF COURSE

Health of the athlete is of paramount importance and needs due considerations. The knowledge regarding different components of nutrition and their implications upon human body in general and loss or gain of weight, appetite, use of different components of foods to remove the deficiencies of sodium and calcium or any other basic ingredients will prove helpful to the Physical Educators.

COURSE CONTENTS

i  INTRODUCTION
  a. Definition, Importance of Food and Nutrients obtained from food
  b. Sports nutrition for maintaining health and improving sports performance

ii CONCEPT OF HUMAN ENERGY
  a. Definition and types of energy
  b. Human Energy systems

iii CARBOHYDRATES
  a. Types and Sources
  b. Metabolism and functions of carbohydrates
  c. Carbohydrate loading
  d. Glycemic Index

iv LIPIDS
  a. Role of lipid in the body
  b. Lipid as energy source and its reserve
  c. Use of lipid during exercise

v PROTEINS
  a. Functions, sources, recommended intake
  b. Metabolism
  c. Protein and exercise
  d. BMI (Body Mass Index)
  e. BMR (Basal Metabolic Rate)

vi VITAMINS
  a. Introduction, sources
  b. Types, importance
c. Food Supplements its uses and importance

vii MINERALS
a. Introduction, sources
b. Types, Importance
c. Mineral intake, supplements

viii WATER
a. Recommended water intake
b. Functions, Regulation of Body Temperature
c. Fuel & Electrolyte losses and replacements
d. Body regulation during exercise

ix WEIGHT MANAGEMENT
a. Concepts of dieting
b. Physiological factors of weight management
c. Obesity

x NUTRITION FOR OPTIMAL HEALTH & PHYSICAL PERFORMANCE
a. Balanced diet
b. Pre, during and post contest meal
c. Dietary recommendations for health & physical performance

RECOMMENDED BOOKS
1. Dr. A Waheed Mughal; Sports Nutrition, Islamabad, 2012
OBJECTIVES OF COURSE
The course has been developed with the objective to provide knowledge of exercise physiology, exercise responses, methods to improve performance, fitness, age and exercise, gender differences, weight control, obesity and exercise environment.

COURSE CONTENTS

i. INTRODUCTION
   a. Definition and nature of exercise physiology.
   b. Importance of exercise physiology in Physical Education

ii. MUSCULAR SYSTEM AND EXERCISE
   a. Muscle: Structure and function
   b. Fiber types and biochemistry
   c. Metabolic fuels for exercise and recovery

iii. CARDIOVASCULAR SYSTEM AND EXERCISE
   a. Muscle blood flow and blood pressure
   b. Work out put, Oxygen consumption and cardiac output.
   c. Training effects on heart, stroke volume and heart rate
   d. Effects of heart disease and old age on athletic performance.

iv. ENVIRONMENT AND EXERCISE
   a. Acclimatization to heat, cold, altitude
   b. Diseases related to environment.

v. NERVOUS SYSTEM AND EXERCISE
   a. Effects of nervous system during exercise
   b. Neuromuscular coordination

vi. GLANDULAR SYSTEM AND EXERCISE
   a. General metabolic and endocrine changes
   b. Effects of therapeutic medication
   c. Hormonal changes

vii. GENDER DIFFERENCES
   a. Exercise and sex differences
   b. Male and Female athletes
   c. Effect on performances and control
viii. **OBESITY**
   a. Definition and types
   b. Hazards
   c. Diabetes
   d. Coronary Heart Diseases (CHD)

**RECOMMENDED BOOKS**

1. Dr. A. Waheed Mughal; Exercise Physiology, Islamabad, 2012
2. Dr. Muhammad Asif, Exercise Physiology, Lahore, 2004-05.
4. Reilly T, 1990, Physiology of Sports, C.V. Brown Publisher, New York, USA.
5. 1989, Powers Exercise Physiology, C. Brown Publisher, New York, USA.
7. Tiwari, Sandhya, Exercise Physiology, 2009 Sports publication, New Delhi
10. Seidentop, D: Introduction to Physical Education, Fitness and Sports, 2009, Mountain View, Caliph, Mayfield
OBJECTIVES OF COURSE
This course is designed to acquaint the students with the injuries its management and rehabilitation elaborating, knee, Tennis Elbow ankle injuries and explaining safety rules and basic physiotherapist treatment to manage in case of emergency.

COURSE CONTENTS
i. INTRODUCTION TO SPORTS INJURIES
   a. Classification:
      i) Cramps
      ii) Ruptures
      iii) Fractures
      iv) Pulled Muscles/Muscle Stiffness
      v) Strains
      vi) Soreness
   b. Identification:
      i) Upper Limb
      ii) Lower Limb

ii. PREVENTION OF INJURIES DURING
    a. Warm up
    b. Skill performance
    c. Play
    d. Use of equipment
    e. Proper cool down

iii. TREATMENT OF INJURIES
    a. Through Exercise
    b. Through Medication
    c. Hydro Therapy/Steam Therapy/Ice Therapy
    d. Pressure Therapy

iv. FRACTURES AND DISLOCATION OF JOINTS
    a. Definitions
    b. Types
    c. Treatment / Rehabilitation

v. MASSAGE
    a. Definition of Massage
    b. Importance of Massage
    c. Methods of Massage
RECOMMENDED BOOKS

1. Dr. A. Waheed Mughal; Sports Injuries, Islamabad, 2012
2. Christopher M Norris, 1997. *Injuries Diagnosis and Management for Physiotherapists*, Butter Worth Heinemann Publisher, UK.
CURRICULUM DEVELOPMENT IN PHYSICAL EDUCATION (3+0 Cr. Hr)

OBJECTIVES OF COURSE
This course is designed with the purpose to acquaint students with basic concepts, theories and types of Health & Physical Education Curriculum related to development process and strategies adopted for evaluation and changes in curriculum as required.

COURSE CONTENTS

i. INTRODUCTION
   a. Definition, Objective of Physical Education Curriculum
   b. Types of Curriculum
   c. Factors effecting Physical Education Curriculum

ii. PLANNING THE PHYSICAL EDUCATION CURRICULUM
   a. Curriculum Development, Tasks in curriculum planning
   b. Coeducation planning, Curriculum opinion, Structuring for quality

iii. CURRICULUM RESEARCH AND CHANGE
   a. Curriculum Reform, Experimentation in Physical Education
   b. Contemporary social problems & Physical Education Curriculum

iv. ORGANIZATION FOR INSTRUCTION
   a. Determining Scope, Sequence and scheduling the curriculum
   b. Flexible Scheduling in Physical Education curriculum
   c. The need for multiple teaching stations
   d. Time Allotment for program Elements, Correlation and Integration
   e. Organizational Design of the curriculum.

v. THE CURRICULUM GUIDE
   a. Curriculum Design, preliminary consideration
   b. The curriculum coordinating committee, collecting materials and constructing the guide

vi. THE PHYSICAL EDUCATION PROGRAMME
   a. The physical education curriculum for Kindergarten, primary, Middle Grade, Secondary & Higher Secondary and Graduate levels
vii. EVALUATING THE CURRICULUM
   a. The intent of Measurement and Evaluation
   b. Measuring progress in Elementary School
   c. Secondary School Evaluation,
   d. Appraising the Total Curriculum

RECOMMENDED BOOKS
1. Dr. A. Waheed Mughal; Planning & Development of Curriculum in
   Physical Education, Islamabad, 2011
2. Carl E Willgoose, The curriculum in physical education prentice
3. Anderson. Van Dyke, Secondary School Administration Houghton
   Mifflin Company, Boston, New York.
5. The New Elementary School Curriculum 2012 by MACMILLAN
7. Education Books & Curriculum by Laurelwood 2012
8. Curriculum Constructional by Laurie Brady 2010 Australia
SPORTS MEDICINE  
(3+0 Cr. Hr)

OBJECTIVES OF COURSE
This course has been designed to make the students aware regarding the sports medicine subject and to give the knowledge of training and conditioning in sports. The course of sports medicine will also help in the development of the skills/knowledge regarding the sports injuries, their prevention, treatment, and rehabilitation. One of the main and very important objectives of this course is designed to aware the students regarding the use of doping in sports, their effects and legal position of the doping in sports.

COURSE CONTENTS
i. INTRODUCTION
   a. Definition of Sports Medicine
   b. History of Sports Medicine

ii. INJURIES IN SPORTS
   a. Classification of Injuries
   b. General Effects of Injuries

iii. PREVENTION OF INJURIES
   a. Fitness
   b. Obeying the Rules
   c. Skills
   d. Equipment
   e. Proper Clothing
   f. Self Control
   i. Warm up and Cooling Down

iv. EXERCISE AND FATIGUE
   a. Definitions
   b. Effects of exercise on sports performance
   c. Effects of fatigue on sports performance

v. FITNESS TESTING AFTER INJURIES
   a. General Consideration in Testing
   b. Fitness Testing (First Level, Second Level)

vi. REHABILITATION IN SPORTS
   a. Principles of Rehabilitation
   b. Local Problems (Pain, Swelling, Restricted Movement)
   c. Non Acute Cases
vii. **DOPING IN SPORTS**

a. Definition
b. Types of Doping
c. Effect of Doping on Athletes
d. Doping Control
e. Use of Doping in Sports

**RECOMMENDED BOOKS**

   International Amateur Athletics Federation (I. A. A. F)
BIOMECHANICS (3+0 Cr. Hr)

OBJECTIVES OF COURSE
This course has been designed to impart basic scientific technical information about body movements involved in sports activities by elaborating biomechanics, form of motion, Kinematics of Physical Activities, Analyzing Games techniques.

COURSE CONTENTS
i. INTRODUCTION
   a. Definition and Prospective
   b. Why study Biomechanics
   c. Importance of Biomechanics for Coach and Athlete
   d. Qualitative & Quantitative Biomechanical Analysis

ii. HUMAN MOMENTS
   a. Form of Motion
   b. Linear
   c. Angular
   d. General Motion
   e. Types of Movements
   f. Factor effecting Human Movement

iii. KINETIC CONCEPTS FOR ANALYZING HUMAN MOTION
   a. Linear Kinetics:
      Inertia, Mass, Force, Newton’s Laws of Motion. Friction, Impulse, Conservation of Momentum, impact, Pressure, work
   b. Angular Kinetics:
      Eccentric Force, Moment, Resultant Moment, Equilibrium, levers-Center of Gravity, Moment of Inertia, Angular, Momentum, Centripetal and Centrifugal force

iv. KINEMATIC CONCEPTS FOR ANALYZING HUMAN MOTION
   a. Linear Kinematics:
      Vectors and Scalars, Distance and Displacement, Speed and Velocity, Acceleration, Projectile Motion
   b. Angular Kinematics:
      Angular Distance and Displacement, Angular Speed, Velocity and Acceleration

v. HUMAN MOVEMENT IN FLUID MEDIUM
   a. Nature of Fluids:
i. Laminar versus Turbulent flow

b. Fluid properties
i. Buoyancy:
   a). Characteristic of Buoyancy forces
   b). Flotation
   c). Flotation of the Human Body

c. Drag
i. Skin friction, Form Drag, Wave Drag

d. Lift Forces:
   i. Foil shape
   ii. Magnus Effects

vi. **BIOMECHANICAL ANALYSIS OF SPORTS TECHNIQUES**

a. Cricket
b. Football
c. Basketball
d. Handball
e. Gymnastics
f. Hockey
g. Badminton
h. Table Tennis
i. Track & Field (Running, Throwing & Jumping)
j. Swimming
k. Volleyball

**RECOMMENDED BOOKS**

1. Dr. A. Waheed Mughal; Sports Biomechanics, Islamabad, 2012
3. W. Herog, 1994, John Wiley & Sons Publisher, USA.
ADMINISTRATION AND MANAGEMENT IN SPORTS  (3+0 Cr. Hr)

OBJECTIVES OF COURSE
Good administration and better management can produce best results. Physical Education and Sports are the fields that require most excellent administration for converting the efforts into real success. This particular course will help the physical educators and sports managers to understand the soul of administrative routines and become aware of the qualities and the qualifications of good administration, in addition to understanding the need of public relations and use of these relations for the promotion of physical education and sports.

COURSE CONTENTS
i.  INTRODUCTION
   a. Meaning and Definition of Administration
   b. Need and importance of Administration in Physical Education
   c. Types of Administration
   d. Qualifications and traits of the Administrator
   e. Duties of Administrator

ii. ADMINISTRATIVE SETUP IN PHYSICAL EDUCATION
    a. Administrative organization and structure
    b. Private and Public organizations
    c. Objectives of the organization
    d. Physical Education at various levels of education in Pakistan
    e. Administrative setup of Sports and Physical Education in Pakistan

iii. PERSONNEL ADMINISTRATION IN PHYSICAL EDUCATION
     a. Principles of personnel Administration
     b. Facilities for staff and staff moral
     c. Teaching load, In-service training
     d. Qualification of staff
     e. Evaluation and Supervision
     f. Conduct of Sports Meeting

iv. CLASS MANAGEMENT
    a. Getting acquainted with the class
    b. Establishing rules for maintaining discipline
    c. Management of time and establishing the class routines
    d. Assignments and learning pace for students
    e. Stimulating students’ interest in Sports
    f. Class environment
    g. Parents involvement and communication
v. **PUBLIC RELATION**
   a. Definition of Public Relation
   b. Objectives
   c. Need and importance of Public Relation in Physical Education
   d. Principles of Public Relation

vi. **PUBLIC RELATION IN PRACTICE**
   a. Teacher Student Relation
   b. Public Relation in various competitions
   c. Community relations
   d. Relations with parents and with general public
   e. Relation with Administration and Inter Departmental Relations

**RECOMMENDED BOOKS**

1. Dr. A. Waheed Mughal; Administration & Management in Physical Education, Islamabad, 2011
2. Charles A. Bucher, Administration of Physical Education and Athletic Programme. The CV. Mosby Company.
OBJECTIVES OF COURSE
The knowledge of Sport Psychology will enable the students to learn more about the organized play and goal setting procedures, which will contribute to the services provided by them in the educational as well as professional institutions.

The people related to the sports have little know how about sports Psychology involvement in sport, which is resulting in the deserting of the ground and sport. This in turn is making the people idle and unhealthy. There is a dire need to clinch the people back to the play fields in order to achieve the goal of strong individuals who may contribute to the success of the nation. Psychology need to be infused at gross root level as it will act as motivator for the young generation, so if the Physical Education Teacher is equipped with the knowledge, he'll be better able to inculcate the theme in the off-springs.

COURSE CONTENTS

i. SPORTS PSYCHOLOGY
   a. Defining Sports and exercise Psychology
   b. Branches of Psychology with Special reference to Exercise and Sports
   c. Difference between Clinical and Educational Sports Psychology
   d. Applications of Psychology in Sports
   e. Role of Sports Psychology

ii. AGGRESSION IN SPORTS
    a. Defining Aggression
    b. Types and Theories of Aggression
    c. Understanding the causes of Aggression
    d. Examining Aggression in Sports:
       • Spectators and aggression
       • Games Reasoning and aggression
       • Athletic injuries and aggression
       • Performance and aggression
       • Team moral atmosphere and aggression

iii. MOTIVATION IN SPORTS
     a. Defining Motivation
     b. Reviewing three approaches to Motivation:
        • Trait-centered View
        • Situation-centered View
c. Interactional View

d. Self Determination Theory (SDT):
   - Five Sub Theories of SDT:
     - Cognitive Evaluation Theory (CET)
     - Organism Integration Theory (OIT)
     - Causality Orientation Theory (COT)
     - Basic Psychological Needs Theory (BPNT)
     - Goal Contents Theory (GCT)

e. Motivation in Elite level sport
f. Self Determination and Training
g. Coaching Behavior and Motivation
h. Motivational Climate

v. GOAL SETTING IN SPORTS
a. Defining Goal Setting
b. Reasons for Goal Setting
c. Types of Goals
   - Outcome Goals
   - Performance Goals
   - Process Goals
   - Team Goals

d. Effectiveness of Goal Setting
e. Principles of Goal Setting
f. Smart Goals
g. Common Problems in Setting Goals

vi. ANXIETY, AROUSAL AND STRESS RELATIONSHIP
a. Differentiating among Stress, Anxiety and Arousal
b. Types of Anxiety
c. Theories of Anxiety
d. Relationship between anxiety and performance Anxiety reduction Techniques
e. Defining Stress
f. Understanding the stress process
g. Concept of Arousal
   - High, Low and Optimal Arousal
h. Relationship between Arousal and Performance

vii. IMAGERY AND PERFORMANCE
a. What is Imagery
b. Difference between Visualization and Imagery
c. Benefits of Imagery
d. Factors affecting the Effectiveness of Imagery
e. How Imagery works
f. Uses of Imagery in Sports
g. How to develop an Imagery Training
h. When to use Imagery

viii. SPORTS COHESION
a. Definition of Cohesion
b. Main Characteristics of Cohesion
c. Personal Factor and Cohesion
d. Team Factor and Cohesion
e. Situational factors and Cohesion
f. Leadership factor and Cohesion

ix. COGNITIVE AND BEHAVIORAL INTERVENTIONS OF SPORTS PERFORMANCE
a. Relaxation Strategies in Sports
b. Coping Strategies
c. Arousal Energizing Strategies
d. Hypnosis

RECOMMENDED BOOKS
1. Dr. A. Waheed Mughal; Sports Psychology, Islamabad, 2010
BASICS OF HUMAN PHYSIOLOGY

(3+0 Cr. Hr)

OBJECTIVES OF COURSE
The outline of this course has been drawn with the objective to provide basic knowledge of human physiology and various parts of the body. It will acquaint the students with initial information about human body structure and its functions.

COURSE CONTENTS
a. INTRODUCTION
   a. Definition of Physiology
   b. Importance of Anatomy and Physiology in Sports
   c. Terms & Terminologies used in Anatomy and Physiology

b. TISSUES AND ORGANS
   a. Definition
   b. Types
   c. Physiology and Functions of Hormones in Human Body

c. PHYSIOLOGY OF SKELETAL SYSTEM
d. PHYSIOLOGY OF MUSCULAR SYSTEM
e. PHYSIOLOGY OF DIGESTIVE SYSTEM
f. PHYSIOLOGY OF CARDIOVASCULAR SYSTEM
g. PHYSIOLOGY OF NERVOUS SYSTEM

RECOMMENDED BOOKS
TALENT IDENTIFICATION IN SPORTS

OBJECTIVES OF COURSE
This course will provide opportunities to familiarize students with the talent in sports and how to develop it on scientific basis. This course will help a sportsman to enhance performance. It will help to a common person, Managers, Coaches and parents to know about the stages and phases of talent development of athletes that ultimately lead towards sporting excellence.

COURSE CONTENTS
i. Talent Identification & Development (TID)
   a. Introduction
   b. Sports Talent
   c. Historical perspective
   d. British

ii. Talent Identification & Development (TID)
   a. South Africa
   b. India
   c. Russia
   d. Germany/Europe

iii. Games & Sports
   a. Kinds of Games & Sports
   b. Objective of Games & Sports
   c. Benefits of Games & Sports

iv. Stages of Talent Identification
   a. Talent Detection
   b. Talent Identification
   c. Talent Development
   d. Talent Selection

v. Stages of Talent Development
   a. Bloom’s Model of Staged Development Stages

vi. Stages of Talent Development
   a. Initiation
   b. Development
   c. Perfection

vii. Role of Coaches in Talent Identification & Development
   a. Role of Coach
   b. Coaching Philosophy

viii. Role of Coaches in Talent Identification & Development
   a. What is coaching
b. Coaching Styles

 ix Mid Term Examination

x Growth & Development

 a. Stages of Growth & Development (male/female)
 b. Physical Development
 c. Pattern Growth in Size
 d. Pattern Growth in Proportion

 xi Case Study and Project

xii Growth & Development

 a. Difference between Boys & Girls
 b. Early & Late Developers

WELLNESS AND FITNESS

(Credit Hr. 3+0)

OBJECTIVES OF COURSE
The course is designed to provide knowledge to the students about their Health and Wellness. This course will create awareness of healthy lifestyle to be adopted and Performing Safe Physical Activities/ Exercise.

1. Introduction
   - Facts about Health and Wellness
   - Facts about Physical Fitness
   - Facts about Healthy lifestyle

2. Readiness for Physical Activity
   - Warm up and Cool down

3. How much Physical Activity is enough?
   - The Principles of Physical activity
   - Physical activity Pyramid
   - Facts about Physical activity
   - Patterns and strategies for action

4. Health Benefits of Physical Activity

5. Safe Physical activity and Exercises

6. Basic Resistance Training Program

7. General Physical Fitness & Sports specific Fitness Program

8. Weight Management

9. Illicit Drugs Use, Misuse & abuse

Books & Reference Material
1. Concepts of Fitness & Wellness: Charles B. Covin, Ruth Lindsey, Gregory Welk
2. Wellness concepts and Application: David J. Anspaugh, Michael H. Hamrick, Frantk T. Rosato
3. Fit & Well: Thomas D. Fahey, Paul M. Insel, Walton T. Roth
5. Back pain & Good posture, Islamabad 2013 By Dr. Waheed Mughal
OBJECTIVES OF COURSE
The course has been designed to provide the students basic knowledge regarding body movement involved in daily practices and sports activities. This course shall also be helpful for the students to understand how to save energy, by maintain a better body position in human motion.

1. INTRODUCTION
   a. Definition of movement Education
   b. Origins of Movement Education
   c. Nature of Movement Education
   d. Theories of Movement

2. GENERAL FACTORS EFFECTING MOVEMENT
   a. Physiological Factors
   b. Psychological Factors
   c. Sociological Factors

3. SELECTED FUNDAMENTAL MOVEMENTS
   a. Loco motor Movements
      Walking-Running-Jumping-Hopping-Sliding-Leaping-Rolling Gliding
   b. Non-Loco motor Movement
      • Curling and Stretching
      • Turning and Twisting
      • Pushing and Pulling
      • Lifting and Lowering
      • Swinging and Circling
      • Stillness and Balancing
   c. Other Areas
      • Movement Sequence
      • Partner and Group Work
      • Small Area Games and Lead-up Activities

General instructions, Body movement, Equipment skills, Games in circle formation, Games in line formation, Games in free formation, Team races, Indoor Games, Football, Cricket, Hockey Games and Sports Day

4. SOMATOTYPING
   a. Historical Overview
   b. Body Types – Sheldon’s Method
   c. Endomorph- Mesomorph-Ectomorph
5. **MASSAGE**
   a. Definition of Massage
   b. Importance of Massage
   c. Types of Massage

**Books & Reference Material**

COURSE CONTENTS OF PRACTICAL (GAMES)

OBJECTIVES OF COURSE
This practical course has been designed with the purpose to provide technical knowledge to students to develop their skills in selected games.

COURSE CONTENTS
1. **TABLE TENNIS (Skills, Coaching and Officiating)**
   a. Stance (Standing Position & Grip)
   b. Service
   c. Strokes
   d. Smash

2. **SQUASH (Skills, Coaching and Officiating)**
   a. Stance (Standing Position & Grip)
   b. Service
   c. Strokes
   d. Footwork

3. **TENNIS (Skills, Coaching and Officiating)**
   a. Stance (Standing Position & Grip)
   b. Service
   c. Strokes
   d. Footwork

4. **BADMINTON (Skills, Coaching and Officiating)**
   a. Stance (Standing Position & Grip)
   b. Service
   c. Strokes
   d. Footwork

5. **NET BALL (Skills, Coaching and Officiating)**
   a. Receiving
   b. Dribbling
   c. Defense
   d. Footwork
   e. Shooting
   f. Vision
   g. Conclusion

6. **HANDBALL (Skills, Coaching and Officiating)**
   a. Grip
   b. Dribbling
   c. Passing
   d. Dodging
   e. Defense
   f. Catching
g. Throwing
h. Shooting

7. **BASKETBALL (Skills, Coaching and Officiating)**
   a. Dribbling
   b. Passing
   c. Defense
   d. Shooting

8. **FOOTBALL (Skills, Coaching and Officiating)**
   a. Kicking
   b. Dribbling
   c. Passing
   d. Shooting
   e. Blocking
   f. Goal Keeping

9. **VOLLEYBALL (Skills, Coaching and Officiating)**
   a. Service
   b. Digging/Reception
   c. Boosting/Setting
   d. Smashing/Attack
   e. Blocking
   f. Court Defense

10. **HOCKEY (Skills, Coaching and Officiating)**
    a. Dribbling
    c. Passing
    d. Stopping
    e. Hitting
    f. Scooping
    g. Goal Keeping

11. **CRICKET (Skills, Coaching and Officiating)**
    a. Stance (Gripping of Bat)
    b. Standing (Position at Crease)
    c. Bowling (Ball Gripping and Run-up)
    d. Fielding
    e. Batting Skills
    f. Wicket Keeping
RECOMMENDED BOOKS

2. Dr. P.Modak, Rules and Principles of Sports & Games, New Delhi, India, 2005
3. Dr. Anil Sharma, Sports Laws (with latest Rules and Management), New Delhi, India, 2004
4. Dr. Anil Sharma, O.P.Sharma, The Illustrated Encyclopedia of Rules in Sports & Games, New Delhi, Sports Publication, 2004
COURSES CONTENTS OF PRACTICAL (TRACK AND FIELD)

OBJECTIVES OF COURSE
The outline of this practical course is prepared with the purpose to provide basic knowledge to the students with modern approach for developing their skills in Track and Field events. Furthermore this course will enable them to develop courage, determination, speed, endurance and self-reliance.

COURSE CONTENTS

1. SPRINTS RACES (100 Meter, 200 Meter, 400 Meter) (Skills, Coaching and Officiating)
   a. Start (Position at Block)
   b. Body Position-Strides (during different phases of race)
   c. Finishing Technique

2. OBSTACLE RACES (Hurdle Races 100m, 110m, 400m) (Skills, Coaching and Officiating)
   a. Start (Position at Block)
   b. Body Position while crossing hurdle and striding
   c. Finishing Technique

3. SPRINT RACES (Relay Races) (Skills, Coaching and Officiating)
   a. Start (Position at Block)
   b. Batten changing
   c. Finishing Technique

4. THROWS (Discuss, Shot Put, Hammer Javelin) (Skills, Coaching and Officiating)
   a. Stance
   b. Grip/Holding
   c. Glide
   d. Throw and Balance

5. JUMPS (Horizontal and Vertical) (Skills, Coaching and Officiating)
   a. Start
   b. Run-up
   c. Jumping style at Takeoff board
   d. Style of crossing bar
   e. Landing
6. **MIDDLE AND LONG DISTANCE RACES (Skills, Coaching and Officiating)**
   a. Start
   b. Running Techniques
   c. Rhythm
   d. Finishing

**RECOMMENDED BOOKS**

5. O.P Sharma, Athletics Skills & Rules, New Delhi, 2003
COURSES CONTENTS OF PRACTICAL (GYMNASTICS APPARATUS WORK)

OBJECTIVES OF COURSE
The purpose of introducing this practical course of Gymnastic Apparatus work is to provide students the basic training to acquire knowledge to participate in healthful activities effectively as means of improving the physical fitness of the youth.

COURSE CONTENTS
1. **EXERCISE ON PARALLEL BAR** (Skills, Coaching and Officiating)
   a. Simple Turn
   b. Forward roll to straddle Seat
   c. Forward Roll
   d. Backward Up Rise
   e. Cartwheel
   f. Twisting
   g. Turning
   h. Backward Roll
   i. Rhythmic Exercise
   j. Front Somersault
   k. Mat Drills
   l. Trampoline Drills

2. **SWIMMING** (Skills, Coaching and Officiating)
   a. Warm up
   b. Dress
   c. Styles
   d. Strokes
   e. Start
   f. Finishing

RECOMMENDED BOOKS

5. Renu Jain, Play & Learn Gymnastics, New Delhi, 2004
6. David Pearson, Play the Game Gymnastics, Great Britain, 1991
APPENDED BELOW ARE THE ADDITIONAL OPTIONAL COURSES RECOMMENDED TO BE SELECTED BY THE UNIVERSITIES AT THEIR CONVENIENCE

APPLIED BIOMECHANICS IN SPORTS

OBJECTIVES OF COURSE
This course would enable the students to carry out different tests to analyze the movement of different body parts through video analysis and other necessary equipment.

SPORTS SOCIOLOGY

OBJECTIVES OF COURSE
This course would enable the students to know about the different technologies being used in different games and sports along with its functions for the purpose of understanding the movement, identifying the mistakes and developing the sporting skills and techniques.

STRENGTH AND CONDITIONING COURSE

OBJECTIVES OF COURSE
This course would be designed to make the students understand, the principles, method, applications and techniques of strength and conditioning for incorporating in fitness program of different levels. The student will also understand difference between the maximum, basic, absolute strength, techniques and other conditioning abilities along with designing, using and setting fitness gym.

RECREATION AND LEISURE SERVICES

OBJECTIVES OF COURSE
This course will help the students to understand the significance of recreational activities for a common man.

PUBLIC RELATION IN SPORTS

OBJECTIVES OF COURSE
The objective of this course is to highlight the significance and introduce the fundamental of public relation with its role in the society and field of sports.
PHYSIOTHERAPY IN SPORTS

OBJECTIVES OF COURSE
This course is designed to help the student to understand injuries and to provide first hand treatment. It will also help to learn different types of injuries and techniques of rehabilitation.
MS/MPhil SPORTS SCIENCES
&
PHYSICAL EDUCATION
SCHEME OF STUDY FOR MS/MPhil IN SPORTS SCIENCES AND PHYSICAL EDUCATION

PROGRAM OBJECTIVES
To encourage creativity, analytical thinking, critical analysis and innovative problem solving in Sports Sciences & Physical Education.
To nourish research potential and promote research activities keeping in view the Pakistani perspective in addition to abreast the students with the most recent developments and trends in the fields of Sports Sciences & Physical Education.

SCOPE
The MS/MPhil course is a pre-doctoral program which develops research aptitude and experiences in the field of Sports Sciences & Physical Education.

ELIGIBILITY CRITERIA
A candidate for admission to the MS/MPhil degree course must hold a MA/MSc degree in the relevant field or an equivalent qualification.
Minimum GPA in semester system must be 2.00 out of 4.00 or at least 60% marks in annual system.
Applicants need to pass GAT (General) test with 50% score conducted by NTS or Entry Test and interview conducted by the University.

DURATION OF THE COURSE
Two Years/Four semester
Minimum 2 years
Maximum 5 Years (Subject to the approval by the Competent Authority)

Credit Hours 24 + 6 = 30 (Three additional courses to be taken in lieu of research)

Medium of Instruction English
MS/MPhil SCHEME OF STUDIES

Total Credit Hours 30        Duration 2 years
Course work 24        Semester 04
Research work/Thesis 06

COURSE OF STUDY

For the MS/MPhil Degree in Sports Sciences & Physical Education there shall be three semesters course work with eight subjects (Theory) of 3 credit hours each, total of 24 credit hours, whereas Research work of 6 credit hours shall be undertaken in the 4th semester as per following details:-

CORE COURSES
1. Training Methods Theories & Training Planning
2. Educational Measurement and Evaluation in Physical Education
3. Nutrition and Athletic performance
4. Planning & Development of Sports Facilities

OPTIONAL COURSES
1. Advance Educational Research Methods (in Physical Edu)
2. Leadership: Theory & Practices
3. Computer Application in Physical Education
4. Media Management & Sports Marketing
5. Special Education
6. Curriculum planning and Development in Physical education
7. Sports Medicine
8. Sports and Exercise Psychology
9. Talent Identification & Development

SEMESTER-I                          Credit Hours: 09

1. Training Methods, Theories & Training Planning (Core) 03 CH
2. Advance Educational Measurement and Evaluation (Core) 03 CH
3. Leadership: Theory & Practice (Optional) 03 CH

SEMESTER-II                          Credit Hours: 09

1. Nutrition and Athletic performance(Core) 03 CH
2. Planning & Development of Sports Facilities (Core) 03 CH
3. Advance Educational Research (Optional) 03 CH
SEMESTER-III
Credit Hours: 06
Two optional subject shall be selected from the list shown above, each of 03 Credit hrs

SEMESTER-IV Research Thesis (Optional) 06 CH

During first 3 Semesters, students need to take 8 courses at the ratio of 3+3+2, while the 4th Semester is reserved for research thesis. In case of Plan-B, the research work can be replaced by three additional courses from the list of electives.

MS SPORTS SCIENCES & PHYSICAL EDUCATION

Subject: ADVANCED RESEARCH METHODS
Credit Hours = 03 (Optional)

COURSE DESCRIPTION
Advanced Research Methods is an advanced lecture/laboratory course in which students are required to apply their existing knowledge of research to the planning, execution, and reporting of research activities. The objectives of this course are:

1. Identification of research problem and its operationalization in specific procedures and designs.
2. Search of relevant literature, summary, and analysis
3. Construction of measuring instruments, experimental procedures, laboratory setups, and selection and treatment of research participants.
4. Analysis and interpretation of data
5. Expression of results in research reports that correspond to the standards of the scholarly journals in the relevant field
6. Ability to use modern research tools

ADVANCE EDUCATIONAL MEASUREMENT & EVALUATION
(in Phy Edu) (Core)

OBJECTIVES OF COURSE

The course is designed to make the students understand and use the statistical means for the research purposes. They will learn about inferential statistics using it in everyday life for the uplift of the discipline and bringing positive reforms in order to achieve the objective.

PLANNING AND DEVELOPMENT OF SPORTS FACILITIES

OBJECTIVES OF COURSE

The course of planning and development of sports facilities will help the scholars to get the know how about planning facilities, its kinds with pre-requisite. This course will also create awareness among the students to understand the developmental procedure, its measurement, financial implications space/area required. It would also throw light on big projects Management its procedure globally and at national level like Gymnasium, Stadium, and Swimming Pool facilities. Professional Sports Laboratories also come under the preview of this course.

SPECIAL EDUCATION (Optional)

OBJECTIVES OF COURSE

The purpose of this course is to provide critical information needed to understand students with disabilities. In addition to introductions of many basic concepts in special Education it covers the Etiology or causes of each disability, salient characteristics of each category in special Education and important issues of students, Teachers & Parents. It also provides knowledge regarding sports activities and rehabilitation program for special persons through physical activities with teaching methods useful for special people to adjust in the society.

CURRICULUM PLANNING AND DEVELOPMENT IN PHYSICAL EDUCATION: (Optional)

OBJECTIVES OF COURSE
The course of curriculum planning and development in physical education is designed to acquaint the students with the historical perspective, theories, kinds, and concepts of curriculum. It also gives the information regarding curriculum planning and development with its process. National Education Policies also come under the purview of this course. It would also enable the scholars to evaluate and design/construct Physical Education Curriculum at different stages from primary to graduate/postgraduate level.

LEADERSHIP: THEORY AND PRACTICE

Course description 03 CH
This course provides an opportunity for practitioners and students to focus on leadership in the sports profession from both theoretical and practical perspectives. The course employs theoretical concepts and models, coupled with case studies based on the experiences of leaders within the profession to understand how to develop leadership potential in oneself and others.

Course Outline
Leadership theory, principles and practices; Communication and diversity in organizations and in a global society; Recurring professional and leadership issues within the local, national, and international structure of the Sports, Health and Physical Education professions.

Recommended learning Resources
Computer Applications in Sports Sciences

Course Mission
This course has been designed for the students of Sports Sciences keeping in consideration their on hand skills related to computing. This course satisfies the core requirement of computing course, therefore, this course has been recommended as one of the basic course for Sports Sciences students.

Course Objectives
There are three major objectives of this course which include:
To impart all basic knowledge of Computer Science
To enable students to work on their own on computers on related application software’s and they will be able to use it for rest of their lives.
To encourage students to make extensive use of computer technology in the field of sports sciences in order to compete with in and out of the country.

Course Description
This course is designed recently to better cater to the needs of Sport Sciences students at Sarhad University so that they can use computers extensively during their studies here, and most likely, will continue to use them even after they graduate. The course aims to convert students into sophisticated power-users, who can comfortably use their computers. However, we aim to do so without burdening students with useless details that have little utility from a user’s perspective. The course will provide a general overview of the computer science disciplines, as well as an introduction to basic application tools like, MS Word, MS Excel, MS PowerPoint and other related software which can help sports sciences graduates in their field and academia. To built the interest of students in computer science special lecture series on some of the interesting areas of research and innovation in computing sciences will be arranged during the semester.

Learning Outcomes
By the end of this course, students will be able to acquire following skills:

- Understand how information technology aids decision-making
- A thorough understanding of a user-level view of computers, and their role in the society.
- Demonstrate a knowledge of computer hardware and software, including “multimedia,” and be familiar with the legal, ethical and privacy issues relating to the use of hardware and software in a business environment.
- The ability to use computers to enhance productivity, regardless of the environment they are going to work
• An overall understanding of the area of computer science, including interesting research areas like computer graphics, networks and artificial intelligence.
• An introduction to some sports related current software’s.
• The ability to create documents in MS Word and MS Power Point and will be able to process data in MS Excel.
• The ability to browse through different websites, blogs and social media and their effective use along with Email System.
• The ability to install downloaded or purchased software, and understand issues like privacy and computer viruses.
• An understanding of enough basic specs and components of computers to make reasonable purchase decisions, along with working knowledge of hardware components.

**Credit and Contact Hours**
This is a 3 credit hour course. 2 credit hours for theory lectures (two hours of lecture will be delivered in each week of the semester except the week reserved for mid semester examination as per university academic calendar, normally this week is 9th or 10th week of a semester). 1 credit hour laid for lab work will be equivalent to 3 contact hours in lab each week expect week reserved for mid semester examination.

Regular lectures will be of two types: theory lectures and lab lectures. In theory lectures, we will cover the related topics of textbook and will provide students with an overview of computer science. In lab lectures, we will discuss software applications and other computer skills along with hardware of computer system. The lab lecture will support the labs, because material covered in it will be essential to complete the lab assignments.

Before Theory class and Lab work students are required to undergo the topic as per course outline given to them in orientation/1st lecture of the subject. Some seminars/group discussions will also be arranged to give you overview of activates happening in the field of computer science.

TRAINING METHODS, THEORIES & TRAINING PLANNING

OBJECTIVES 3 CH

The course of Training Methods, Theories and Training Planning focuses on the students so to enable them to have more comprehensive understanding of relationship of Theory & practice of Training Methods. The purpose of this course is to rectify their concepts & to provide opportunities for meaningful understanding of Training Methodologies, Training Principles, Motor Learning, short term and long term planning with micro mezzo and macro cycles constructions. Furthermore the Coach, Athlete and Parent relationship would also be under discussion in this course which would provide adequate knowledge to the Coaches to make the training process interesting and meaningful.

NUTRITION & ATHLETIC PERFORMANCE

Course Description: This course covers the essentials of human nutrition that improve and sustain optimal performance for sport and exercise. The effects of eating disorders (in both male and female athletes), weight management, and sport nutrition resources are also discussed.

Course Objectives

After successfully completing this course you will be able to
- identify the basic functions of macronutrients and micronutrients and describe their function in sport performance;
- describe the basics of nutrient timing, including how often athletes should eat, eating before during and after exercise, and how nutrient timing affects performance and body composition;
- discuss an athlete’s basic fluid needs, including how fluids facilitate metabolism, how dehydration affects sport performance, and how caffeine and alcohol can adversely affect performance;
- list the most common dietary supplements and ergogenic aids as they apply to sport;
- evaluate the research behind, applications for, and potential risks associated with dietary supplements;
- identify athletes who present with eating disorder symptoms and know appropriate resources for referral;
- discuss the principles of body composition testing and testing methods as they apply to athletes;
- be able to identify the difference between nutrition concepts that are grounded in myth (fad diets) and facts (nutrition science);
- identify athletes who present with eating disorder symptoms and know appropriate resources for referral; Understand the risk factors for disordered eating and how to minimize any athletes’ potential risk;
- identify the components of the female athlete triad and nutrition treatment guidelines; and
- list the 10 core principles of Intuitive Eating and how they relate to a non-diet approach to health.

**Recommended Books**

1. Dr. A. Waheed Mughal, Talent Identification, 2014, Islamabad
English I (Functional English)

Objectives: Enhance language skills and develop critical thinking.

Course Contents
Basics of Grammar
Parts of speech and use of articles
Sentence structure, active and passive voice
Practice in unified sentence
Analysis of phrase, clause and sentence structure
Transitive and intransitive verbs
Punctuation and spelling

Comprehension
Answers to questions on a given text

Discussion
General topics and every-day conversation (topics for discussion to be at the discretion of the teacher keeping in view the level of students)

Listening
To be improved by showing documentaries/films carefully selected by subject teachers

Translation skills
Urdu to English

Paragraph writing
Topics to be chosen at the discretion of the teacher

Presentation skills
Introduction

Note: Extensive reading is required for vocabulary building

Recommended Books
1. Functional English
a) Grammar

b) Writing

c) Reading/Comprehension

d) Speaking

**English II (Communication Skills)**

**Objectives:** Enable the students to meet their real life communication needs.

**Course Contents:**

**Paragraph writing**
Practice in writing a good, unified and coherent paragraph

**Essay writing**
Introduction

**CV and job application**
Translation skills
Urdu to English

**Study skills**
Skimming and scanning, intensive and extensive, and speed reading, summary and précis writing and comprehension

**Academic skills**
Letter/memo writing, minutes of meetings, use of library and internet
Presentation skills
Personality development (emphasis on content, style and pronunciation)

Note: documentaries to be shown for discussion and review

Recommended Books
Communication Skills
a) Grammar

b) Writing

c) Reading
   2. Reading and Study Skills by John Langan

English III (Technical Writing and Presentation Skills)

Objectives: Enhance language skills and develop critical thinking

Course Contents

Presentation skills

Essay writing
Descriptive, narrative, discursive, argumentative

Academic writing
How to write a proposal for research paper/term paper
How to write a research paper/term paper (emphasis on style, content, language, form, clarity, consistency)

Technical Report writing

Progress report writing

*Note: Extensive reading is required for vocabulary building*

Recommended Books

Technical Writing and Presentation Skills

a) Essay Writing and Academic Writing

b) Presentation Skills

c) Reading
   The Mercury Reader. A Custom Publication. Compiled by Northern Illinois University. General Editors: Janice Neulib; Kathleen Shine Cain; Stephen Ruffus and Maurice Scharton. (A reader which will give students exposure to the best of twentieth century literature, without taxing the taste of engineering students).
Pakistan Studies (Compulsory)

Introduction/Objectives

- Develop vision of historical perspective, government, politics, contemporary Pakistan, ideological background of Pakistan.
- Study the process of governance, national development, issues arising in the modern age and posing challenges to Pakistan.

Course Outline

1. **Historical Perspective**
   b. Factors leading to Muslim separatism
   c. People and Land
      i. Indus Civilization
      ii. Muslim advent
      iii. Location and geo-physical features.

2. **Government and Politics in Pakistan**
   Political and constitutional phases:
   a. 1947-58
   b. 1958-71
   c. 1971-77
   d. 1977-88
   e. 1988-99
   f. 1999 onward

3. **Contemporary Pakistan**
   a. Economic institutions and issues
   b. Society and social structure
   c. Ethnicity
   d. Foreign policy of Pakistan and challenges
   e. Futuristic outlook of Pakistan

**Recommended Books**

ISLAMIC STUDIES
(Compulsory)

Objectives

This course is aimed at:
1. To provide Basic information about Islamic Studies
2. To enhance understanding of the students regarding Islamic Civilization
3. To improve Students skill to perform prayers and other worships
4. To enhance the skill of the students for understanding of issues related to faith and religious life.

Detail of Courses

Introduction to Quranic Studies
1. Basic Concepts of Quran
2. History of Quran
3. Uloom-ul-Quran

Study of Selected Text of Holly Quran
1. Verses of Surah Al-Baqara Related to Faith (Verse No-284-286)
2. Verses of Surah Al-Hujrat Related to Adab Al-Nabi (Verse No-1-18)
3. Verses of Surah Al-Mumanoon Related to Characteristics of faithful (Verse No-1-11)
4. Verses of Surah al-Furqan Related to Social Ethics (Verse No.63-77)
5. Verses of Surah Al-Inam Related to Ihkam (Verse No-152-154)

Study of Selected Text of Holly Quran
1. Verses of Surah Al-Ihzab Related to Adab al-Nabi (Verse No.6, 21, 40, 56, 57, 58.)
2. Verses of Surah Al-Hashar (18,19,20) Related to thinking, Day of Judgment
3. Verses of Surah Al-Saf Related to Tafakar, Tadabar (Verse No-1,14)

Seerat of Holy Prophet (S.A.W) I
1. Life of Muhammad Bin Abdullah (Before Prophet Hood)
2. Life of Holy Prophet (S.A.W) in Makkah
3. Important Lessons Derived from the life of Holy Prophet in Makkah
Seerat of Holy Prophet (S.A.W) II
1. Life of Holy Prophet (S.A.W) in Madina
2. Important Events of Life Holy Prophet in Madina
3. Important Lessons Derived from the life of Holy Prophet in Madina

Introduction to Sunnah
1. Basic Concepts of Hadith
2. History of Hadith
3. Kinds of Hadith
4. Uloom –ul-Hadith
5. Sunnah & Hadith
6. Legal Position of Sunnah

Selected Study from Text of Hadith

Introduction to Islamic Law & Jurisprudence
1. Basic Concepts of Islamic Law & Jurisprudence
2. History & Importance of Islamic Law & Jurisprudence
3. Sources of Islamic Law & Jurisprudence
4. Nature of Differences in Islamic Law
5. Islam and Sectarianism

Islamic Culture & Civilization
1. Basic Concepts of Islamic Culture & Civilization
2. Historical Development of Islamic Culture & Civilization
3. Characteristics of Islamic Culture & Civilization
4. Islamic Culture & Civilization and Contemporary Issues

Islam & Science
1. Basic Concepts of Islam & Science
2. Contributions of Muslims in the Development of Science
3. Quran & Science

Islamic Economic System
1. Basic Concepts of Islamic Economic System
2. Means of Distribution of wealth in Islamic Economics
3. Islamic Concept of Riba
4. Islamic Ways of Trade & Commerce

Political System of Islam
1. Basic Concepts of Islamic Political System
2. Islamic Concept of Sovereignty
3. Basic Institutions of Govt. in Islam

Islamic History
1. Period of Khilaf-E-Rashida
2. Period of Ummayyads
3. Period of Abbasids

Social System of Islam
1. Basic Concepts of Social System of Islam
2. Elements of Family
3. Ethical Values of Islam

Reference Books
1. Hameed ullah Muhammad, "Emergence of Islam", IRI, Islamabad
2. Hameed ullah Muhammad, "Muslim Conduct of State"
3. Hameed ullah Muhammad, "Introduction to Islam"
4. Mulana Muhammad Yousaf Islahi,
9. Dr. Muhammad Zia-ul-Haq, "Introduction to Al Sharia Al Islamia" Allama Iqbal Open University, Islamabad (2001)
Note: One course will be selected from the following six courses of Mathematics.

COMPULSORY MATHEMATICS COURSES FOR BS (4 YEAR)

(FOR STUDENTS NOT MAJORING IN MATHEMATICS)

1. MATHEMATICS I (ALGEBRA)

Prerequisite(s): Mathematics at secondary level

Credit Hours: 3 + 0

Specific Objectives of the Course: To prepare the students, not majoring in mathematics, with the essential tools of algebra to apply the concepts and the techniques in their respective disciplines.

Course Outline:

Preliminaries: Real-number system, complex numbers, introduction to sets, set operations, functions, types of functions. Matrices: Introduction to matrices, types, matrix inverse, determinants, system of linear equations, Cramer’s rule.

Quadratic Equations: Solution of quadratic equations, qualitative analysis of roots of a quadratic equations, equations reducible to quadratic equations, cube roots of unity, relation between roots and coefficients of quadratic equations.

Recommended Books

2. MATHEMATICS II (CALCULUS)

**Prerequisite(s):** Mathematics I (Algebra)

**Credit Hours:** 3 + 0

**Specific Objectives of the Course:** To prepare the students, not majoring in mathematics, with the essential tools of calculus to apply the concepts and the techniques in their respective disciplines.

**Course Outline**

**Recommended Books**

4. Thomas GB, Finney AR, Calculus (11th edition), 2005, Addison-Wesley, Reading, Ma, USA

3. MATHEMATICS III (GEOMETRY)

**Prerequisite(s):** Mathematics II (Calculus)

**Credit Hours:** 3 + 0

**Specific Objectives of the Course:** To prepare the students, not majoring in mathematics, with the essential tools of geometry to apply the concepts and the techniques in their respective disciplines.
Course Outline

Geometry in Two Dimensions: Cartesian-coördinate mesh, slope of a line, equation of a line, parallel and perpendicular lines, various forms of equation of a line, intersection of two lines, angle between two lines, distance between two points, distance between a point and a line.

Circle: Equation of a circle, circles determined by various conditions, intersection of lines and circles, locus of a point in various conditions.

Conic Sections: Parabola, ellipse, hyperbola, the general-second-degree equation

Recommended Books

4. COURSE FOR NON-MATHEMATICS MAJORS IN SOCIAL SCIENCES

Title of subject: MATHEMATICS
Discipline: BS (Social Sciences).
Pre-requisites: SSC (Metric) level Mathematics
Credit Hours: 03 + 00
Minimum Contact Hours: 40
Assessment: written examination;
Effective: 2008 and onward

Aims: To give the basic knowledge of Mathematics and prepare the students not majoring in mathematics.

Objectives: After completion of this course the student should be able to:

- Understand the use of the essential tools of basic mathematics;
- Apply the concepts and the techniques in their respective disciplines;
- Model the effects non-isothermal problems through different domains;

Contents:
1. Algebra

Preliminaries: Real and complex numbers, Introduction to sets, set operations, functions, types of functions. Matrices: Introduction to

2. Statistics

Recommended Books

5. MATHEMATICS FOR CHEMISTRY
   Credit Hours: 3
   Prerequisites: Mathematics at Secondary level
   Specific Objectives of Course:
   To prepare the students not majoring in mathematics with the essential tools of Calculus to apply the concepts and the techniques in their respective disciplines.
Course Outline

Recommended Books

6. MATHEMATICS FOR PHYSICS

Contents

1. Preliminary calculus.

- Differentiation
  Differentiation from first principles; products; the chain rule; quotients; implicit differentiation; logarithmic differentiation; Leibnitz’ theorem; special points of a function; theorems of differentiation.

- Integration
  Integration from first principles; the inverse of differentiation; integration by inspection; sinusoidal function; logarithmic integration; integration using partial fractions; substitution method; integration by parts; reduction formulae; infinite and improper
integrals; plane polar coordinates; integral inequalities; applications of integration.

2. **Complex numbers and hyperbolic functions**
   - The need for complex numbers
   - Manipulation of complex numbers
     - Additions and subtraction; modulus and argument; multiplication; complex conjugate; division
   - Polar representation of complex numbers
     - Multiplication and division in polar form
   - de Moivre’s theorem
     - Trigonometrical identities; finding the nth roots of unity; solving polynomial equations
   - Complex logarithms and complex powers
   - Applications to differentiation and integration
   - Hyperbolic functions
     - Definitions; hyperbolic-trigonometric analogies; identities of hyperbolic functions; solving hyperbolic equations; inverses of hyperbolic functions; calculus of hyperbolic functions

3. **Series and limits**
   - Series
   - Summation of series
     - Arithmetic series; geometric series; arithmetico-geometric series; the difference method; series involving natural numbers; transformation of series
   - Convergence of infinite series
     - Absolute and conditional convergence; convergence of a series containing only real positive terms; alternating series test
   - Operations with series
   - Power series
     - Convergence of power series; operations with power series
   - Taylor series
     - Taylor’s theorem; approximation errors in Taylor series; standard McLaurin series
   - Evaluation of limits

4. **Partial differentiation**
   - Definition of the partial derivative
   - The total differential and total derivative
   - Exact and inexact differentials
- Useful theorems of partial differentiation
- The chain rule
- Change of variables
- Taylor's theorem for many-variable functions
- Stationary values of many-variable functions
- Stationary values under constraints

5. **Multiple integrals**
- Double integrals
- Triple integrals
- Applications of multiple integrals
  Areas and volumes; masses, centers of mass and centroids; Pappus' theorems; moments of inertia; mean values of functions
- Change of variables in multiple integrals

6. **Vector algebra**
- Scalars and vectors
- Addition and subtraction of vectors
- Multiplication by a scalar
- Basis vectors and components
- Magnitude of a vectors
- Multiplication of vectors
  Scalar product; vector product; scalar triple product; vector triple product
- Equations of lines and planes
  Equation of a line; equation of a plane
- Using vectors to find distances
  Point to line; point to plane; line to line; line to plane
- Reciprocal vectors

7. **Matrices and vector spaces**
- Vectors spaces
  Basic vectors; the inner product; some useful inequalities
- Matrices
- The complex and Hermitian conjugates of a matrix
- The determinant of a matrix
  Properties of determinants
- The inverse of a matrix
- The rank of a matrix
- Simultaneous linear equations
  N simultaneous linear equations in N unknowns
• Special square matrices
  Diagonal; symmetric and antisymmetric; orthogonal; Hermitian; unitary normal
• Eigen vectors and eigen values
  Of a normal matrix; of Hermitian and anti-Hermitian matrices; of a unitary matrix; of a general square matrix
• Determination of eigen values and eigen vectors Degenerate eigen values

8. Vector calculus
• Differentiation of vectors Composite vector expressions; differential of a vector
• Integration of vectors
• Space curves
• Vector functions of several arguments
• Surfaces
• Scalar and vector fields
• Vector operators
• Gradient of a scalar field; divergence of a vector field; curl of a vector field
• Vector operator formulae
• Vector operators acting on sums and products; combinations of grad, div and curl
• Cylindrical and spherical polar coordinates
• Cylindrical polar coordinates; spherical polar coordinates.
ANNEXURE - E

Statistics-I

Definition and importance of Statistics in Agriculture, Data Different types of data and variables

Classification and Tabulation of data, Frequency distribution, stem-and-Leaf diagram, Graphical representation of data Histogram, frequency polygon, frequency curve.

Measure of Central tendency, Definition and calculation of Arithmetic mean, Geometric mean, Harmonic mean, Median quantiles and Mode in grouped and un-grouped data.

Measure of Dispersion, Definition and Calculation of Range, quartile deviation, Mean deviation, Standard deviation and variance, coefficient of variation.

Practical

a. Frequency Distribution
b. Stem-and-Leaf diagram
c. Various types of Graphs
d. Mean, Geometric mean Harmonic Mean,
e. Median, Quartiles Deviation, mean Deviation.
f. Standard Deviation, Variance, Coefficient of variation,
g. Skewness  and kenosis

Recommended Books

1. Introduction to Statistical Theory Part- I by Sher Muhammad and Dr. Shahid Kamal (Latest Edition)
2. Statistical Methods and Data Analysis by Dr. Faquir Muhammad
4. Basic Statistics an Inferential Approach 2nd Ed. (1986) Fran II. Dietrich-II and Thomas J. Kean

Statistics-II

Sampling Probability and non-Probability Sampling, Simple random sampling stratified random sampling Systematic sampling error, Sampling
distribution of mean and difference between two means. Interference Theory: Estimation and testing of hypothesis, Type—I and type-II error, Testing of hypothesis about mean and difference between two means using Z-test and t-test, Paired t-test, Test of association of attributes using X2 (chi-square) Testing hypothesis about variance.

Practical
a. Sampling random sampling
b. Stratified random sampling.
c. Sampling distribution of mean
d. Testing of hypotheses regarding population mean
e. Testing of hypotheses about the difference between population means
f. Chi-square test
g. Testing of Correlation Coefficient
h. Fitting of simple linear regression
i. One-way ANOVA
j. Two-way ANOVA

Recommended Books
1. Introduction to Statistical Theory Part-II by Sher Muhammad and Dr. Shahid Kamal (Latest Edition)
2. Statistical Methods and Data Analysis by Dr. Faquir Muhammad
Introduction to Information and Communication Technologies

Course Structure:
Lectures: 2   Labs: 1   Credit Hours: 3
Pre-requisite:  None   Semester: 1

Course Description

This is an introductory course on Information and Communication Technologies. Topics include ICT terminologies, hardware and software components, the internet and World Wide Web, and ICT based applications.

After completing this course, a student will be able to:

- Understand different terms associated with ICT
- Identify various components of a computer system
- Identify the various categories of software and their usage
- Define the basic terms associated with communications and networking
- Understand different terms associated with the Internet and World Wide Web.
- Use various web tools including Web Browsers, E-mail clients and search utilities.
- Use text processing, spreadsheets and presentation tools
- Understand the enabling/pervasive features of ICT

Course Contents

Basic Definitions & Concepts
Hardware: Computer Systems & Components
Storage Devices, Number Systems
Software: Operating Systems, Programming and Application Software
Introduction to Programming, Databases and Information Systems
Networks
Data Communication
The Internet, Browsers and Search Engines
The Internet: Email, Collaborative Computing and Social Networking
The Internet: E-Commerce
IT Security and other issues
Project Week
Review Week
Text Books/Reference Books

RECOMMENDATIONS BS (4 –YEAR) PROGRAM

After discussions and detailed deliberations, the committee unanimously made following recommendations:

i. Teacher being the key person in teacher-learning process, it is imperative that he/she should be aware of or have means to be aware of the latest developments in the field of Sports and Physical Education. In order to ensure this, it is strongly recommended that Higher Education Commission should hold refresher courses in coordination with Pakistan Sport Boar/National Council for Health Physical Education & Sport Sciences of Pakistan (NCHPESS).

ii. It is recommended that Higher Education Commission should procure funds to run BS (4 Years) Health and Physical Education program.

iii. The linkage in both teaching and research disciplines is encouraged between the universities and sports organizations.

iv. To implement the BS (4-Years) program the Government and Universities will have to provide extra facilities for teaching extra courses and for provision of latest equipment.

v. The Provinces will have to be involved at the highest level for the implementation of BS (4-Years) program.

vi. The committee is of unanimous opinion that the nomenclature of the discipline may be changed / replaced by Sports Sciences and Physical Education instead of Health and Physical Education, as being used globally.

vii. The committee unanimously resolved that HEC may arrange annual meeting to review the courses and problems faced by the departments during the past 2 semesters in the completion of courses.

viii. The committee strongly recommended that the changes which are made in the practical may be communicated to the concerned quarters for implementation.
RECOMMENDATIONS MS / MPHIL PROGRAMS

1. The Committee unanimously proposed maximum New subjects for MS/MPhil course work as guidelines for the Universities offering MS/MPhil Programs in Physical Education/Sports Sciences.

2. Research, being an important component of the MS/MPhil Programs be given due importance and the HEC may provide all possible assistance to the newly established department of Physical Education in the Universities of different Provinces and AJK, imparting such education.

3. More opportunities of trainings, refresher course, workshops etc. be given to the faculty members of the Universities offering MPhil Programs and HEC may extend maximum support in realizing the above objective.

4. Efforts should be made to build working relationship among the sister Universities offering the research programs.

5. A mechanism should be developed to bring uniformity amount the departments offering MPhil Programs through HEC.

The meeting was ended with the vote of thanks to and by the Chair.
